PARCEL 17 & 18

Note:

Plant palettes have been established for the types and catagories of landscapes. Though the plant pallettes are extensive enough to accomodate varying site conditions and allow design flexibility, it is the intent that the pallette be simple and dedicated consistent with the existing desert landscape. Therefore only a few species may be specified from within the conceptual legend. Alternate species may be selected with City of Mesa approval. Salvage plant material shall be specified and indicated on landscape construction documents.
