Citizen Participation Report

Case No. PRS18-00244

Rezoning & Site Plan Review

March 5, 2019

Overview:

The purpose of this Citizen Participation Report is to provide the City of Mesa staff with information regarding the efforts made by the Applicant to inform citizens and property owners concerning the Applicant's request to the City of Mesa for a modification to the PAD zoning and Site Plan for the property located at 2639 N. Power Road Mesa, AZ 85207 (APN 219-25-941).

By providing opportunities for citizen participation, the Applicant has ensured that those affected by this application have had an adequate opportunity to learn about and comment on the proposed plan.

Contact Information:

Those coordinating the Citizen Participation activities are as follows:

Reese L. Anderson
Pew & Lake, PLC.
1744 S. Val Vista Drive, Suite 217
Mesa, AZ 85204
(480)461-4670 (office)

Mesa, AZ 85204
(480)461-4670 (office)
(480)461-4676 (fax)
djstapley@pewandlake.com

Actions:

In order to provide effective citizen participation in conjunction with this application, the following actions were taken to provide opportunities for feedback from surrounding property owners:

1. A neighborhood meeting was held on September 5, 2018 with the applicant, citizens and interested parties to discuss the proposed project. Seven (7) citizens, comprising five (5) households, attended. A description of the project and the dialogue related to neighbor questions and comments is attached as "1st Neighborhood Meeting Summary".
2. The notification list for the neighborhood meeting included all property owners within 1000' of the subject property. Additionally, registered neighborhood contacts within 1-mile of the property were notified (the registered neighborhood contacts list was obtained from the City of Mesa). A total of three-hundred three (303) notification letters were sent with two-hundred seventy (270) notification letters sent to property owners and thirty-three (33) notification letters sent to neighborhood association contacts and registered persons.

A copy of the notification letter for the neighborhood meeting is included with this Citizen Participation Report.

3. An additional, voluntary, neighborhood meeting was held on October 3, 2018 with the property owner, applicant, citizens and interested parties to discuss the proposed project. Five (5) citizens attended. Three (3) members of the development team attended. A description of the project and the dialogue related to neighbor questions and comments is attached as “2nd Neighborhood Meeting Summary”. One comment card was filled out with a request related to building height.
4. The notification list for the 2nd neighborhood meeting included the twenty-nine (29) homes directly south of the project and the additional three (3) neighbors who attended the first neighborhood meeting, which don’t live directly to the south.
5. An e-mail distribution was collected at the neighborhood meetings in an effort to have continued dialogue with those in attendance at the meeting concerning changes, if any, to the proposed development plans.
6. Identical letters were sent to Vice Mayor David Luna and Director John Wesley to summarize the changes made in response to citizen input and a copy is attached to this report.
7. In accordance with ARS § 9-462.04 (A) (4) and Mesa Zoning Ordinance Section 11-67-5, property owners within 500-feet of the property will be notified of hearings with the Planning and Zoning Board at least 14-days prior to the scheduled hearing.
 - a. Additionally, notification for the associated Design Review Board Work Session Meeting was provided to property owners within 500-feet of the subject site. Stamped, sealed, and addressed letters were delivered to the City of Mesa after 1st Review Comments in order to ensure accuracy of information being sent to property owners per phone discussion with Charlotte Bridges, Mesa Planning Staff.

Results:

Summary of concerns/issues and how the Applicant has addressed them is provided below. This summary comprises concerns/issues which were raised throughout the entire Citizen Participation process rather than bisecting issues solely raised at any specific neighborhood meeting:

1. **Summary: The main topics discussed were: (a) the multifamily product type, (b) building setbacks and privacy, (c) the property’s zoning history, and (d) traffic and parking.**

In relation to item (a) the product type, we discussed that the proposed multifamily community will be a quality, market-rate community consisting of approximately 196 units. A variety of studio, 1-, 2-, and 3-bedroom units will be offered and all buildings feature four-sided architecture consisting of patios, balconies, unit projections, and façade articulation to provide architectural interest.

In relation to item (b) building setbacks and privacy, we discussed that the two apartment buildings along the southern portion of the site were set back approximately 30-40 feet from the shared property boundary with the existing single-family community to the south.

This would allow for a dense landscape buffer area consisting of trees and shrubs to block views.

In relation to item (c) the property's zoning history, it was discussed that in 1990, the subject property was zoned for commercial. In 2005, the property was rezoned to RM-3 to accommodate a three-story condominium PAD development that was to be called Aquila La Sendas. Since 2005, the property has been left undeveloped. The current RM-3 zoning designation does allow for multifamily land uses up to 20 dwelling units per acre.

In relation to item (d) traffic and parking, Continental noted that ingress and egress will be off Power Road at an existing right-in, right-out curb cut. Vehicles traveling southbound on Power Road can access the site through the LA Fitness, which was designed years ago to accommodate traffic to both its property and this subject property. Vehicles entering LA Fitness property will follow an existing access easement that leads to a traffic circle that LA Fitness built, which will manage access to and from both properties. It was also noted that all parking for the multifamily community would be held on-site as the community will be fenced and gated, avoiding any overflow parking into LA Fitness or adjacent streets. A full copy of the neighborhood meeting minutes is attached.

2. After the neighborhood meetings, Continental reviewed the items discussed at the meetings and has revised its site plan to address items discussed at the meetings. The following site plan changes have been incorporated into the new site plan, as shown in the submitted revised site plan:
 - a. **Total Number of Buildings:** The total number of buildings have been reduced from nine (9) two-story residential buildings to seven (7) three-story residential buildings, still maintaining the same 196-unit count as previously proposed. However, the developer has lowered the south buildings to two stories (see buildings 2, 3 and 4), which decreases the units to 192.
 - b. **Building Height:** Some neighbors indicated they prefer two-story buildings. The three-story residential buildings are approximately 39 feet in height, below the 40-foot maximum building height per RM-3 zoning standards and comparable to the approved three-story, 35-foot tall condominium building heights approved in the 2005 PAD. Since the 2nd Neighborhood Meeting, in response to citizen comments, the Site Plan has been further revised to provide 2-story buildings on the south side and is included with this submittal.
 - c. **Southern Setback:** By reducing the total number of residential buildings, a greater building setback and landscape buffer can be implemented along the southern property boundary adjacent to the existing single-family community. Two rows of trees will be added with special emphasis on staggered placement to screen views to and from the south. There are many options for trees with a screening effect. Tree type is unknown at this time, but will comply with the City's drought-tolerant tree requirements.

In Continental's original site plan, there was a building setback of 35-40 feet between its two residential buildings fronting the single-family community and the shared property boundary. In Continental's revised site plan, the two residential apartment buildings are set back between 135 feet and 104 feet from the shared

southern property boundary with the single-family community. This larger building setback provides greater privacy and provides additional landscape buffer area for trees and shrubs to block views of the apartment buildings. This larger building setback also exceeds the existing 75-foot building setbacks established in the approved 2005 zoning case. Building 3 will have a parking aisle and covered parking structures between the building and the south property line. Building 4 will back onto a wide landscaped area and retention basin.

- d. **Parking Ratio:** Reducing the total number of buildings also allows for more parking opportunities. In the original site plan, parking was provided at a ratio of 2.01 parking spaces per unit, under the 2.10 parking spaces per unit requirement set forth in the MZO. In the revised site plan, parking has been added to achieve the required 2.10 parking spaces per unit ratio, avoiding the need for any parking deviations.
 - e. **Open Space:** The revised site plan also includes more open space due to removing two residential buildings. Open spaces amenities still include a perimeter walking trail, pet playground, pedestrian connection to the adjacent canal, pergolas, grilling stations, and a fire pit. Continental will also offer a concierge trash service where on-site staff will collect and dispose of trash from the individual units.
3. Concerning maintenance, apartment management will actively maintain the trees and perimeter landscaping. The applicant acknowledged comments about current trespassing and littering that occurs. The proposed development will resolve that.
 4. Two neighbors requested an update regarding traffic congestion and limited access. They requested whether alternatives were feasible, such as a full median break, traffic light, or two-way left-turn lanes. The applicant outlined the access plan in place since the development of surrounding properties. The Traffic Department has standards that must be complied with to ensure maximum possible safety given the multiple nearby driveways. After the last citizen meeting, the applicant met with City staff and reported the traffic concerns, but has not heard back. This project's formal application has not yet been submitted, so there is still time for the all parties to consider the traffic issues.
 5. Regarding additional neighborhood follow-up, the Applicant met with individual neighbors, which meetings are summarized as follows:
 - a. On Thursday, February 7, the Applicant, Eric Gumm met with two neighbors who own and reside in homes adjacent the subject property to the south – Jaynee Teagardin (7034 E. Culver St.), and Allen Gilbert (7022 E. Culver St) – which meeting was held at the Teagardins' residence at 7034 E. Culver St. They had a general follow-up discussion, in which the Applicant explained that nothing had materially changed since the last neighborhood meeting. They were further informed that the Applicant would work with its landscape architect when the detailed landscape plans were prepared for development, so that they can locate trees along the southern property line and address any maintenance issues (flowers dropping in pools, etc...) and also that the trees would provide some visual buffer between their homes and the apartment units facing south. The neighbors were pleased and accepted this proposed course of action.

- b. On Tuesday, February 19, the applicant met with Lauren Owens, who also resides adjacent to the subject property at 6938 E. Culver Street. They discussed the property, and the Applicant provided the same information as at the February 7 meeting with neighbors. Mrs. Owens was similarly pleased with the report.
6. Concerns and issues not addressed and why: The Applicant has addressed all comments from neighbors as discussed above.

Attached Exhibits:

- A) List of property owners within 1000' feet of the subject property and registered neighborhood contacts within 1 mile of the property
- B) Notification map of surrounding property owners
- C) Notification letter for the 1st Neighborhood Meeting
- D) Sign-In Sheet for 1st Neighborhood Meeting
- E) 1st Neighborhood Meeting Summary
- F) 1st Neighborhood Meeting Site Plan
- G) List of property owners directly adjacent to the property
- H) Notification map of directly adjacent property owners
- I) Notification letter for the 2nd Neighborhood Meeting
- J) Sign-In Sheet for 2nd Neighborhood Meeting
- K) Comment Card 2nd Neighborhood Meeting
- L) 2nd Neighborhood Meeting Summary
- M) 2nd Neighborhood Meeting Site Plan
- N) Letter to Vice Mayor Luna
- O) Revised Site Plan

Anticipated Schedule:

- Pre-Application Submittal – March 28, 2018
- Pre-Submittal Conference – April 16, 2018
- 1st Neighborhood Meeting – September 5, 2018
- 2nd Neighborhood Meeting – October 3, 2018
- Formal Application – December 14, 2018
- 2nd Submittal – February 12, 2019
- Design Review Work Session – February 12, 2019
- Planning and Zoning Board Hearing – *March 20, 2019*

City Council Introduction – *April 1, 2019*

City Council Final Action – *April 15, 2019*

Re: Neighborhood Meeting – Springs at Mesa
Mesa, AZ

Dear Neighbor:

As you may be aware, our company, Continental Properties Company, Inc. (“Continental”) is working on a proposal to develop, own and operate a high-quality, market-rate multifamily community (“Community”) in Mesa, AZ. At approximately 10.50 acres in size, the vacant land is located approximately one quarter of a mile south of McDowell Road on the east side of Power Road; also known as Maricopa County Assessor Parcel No. 219-25-941.

This property was previously zoned RM-3 (PAD), which stands for Residential Multiple Dwelling with a Planned Area Development overlay, but subsequently, that project was never developed. Our specific requests to the City are for a PAD amendment and Site Plan modification.

The Springs at Mesa community will be gated and fenced and feature approximately 196 homes, offering a range of studio, 1-, 2-, and 3-bedroom homes in nine (9), two-story residential apartment structures. Each home will have private, ground-level entries. All exterior elevations consist of quality, durable materials, including stucco and stone masonry.

We would like to extend an invitation for you to join us at Las Sendas Elementary School in the Multi-Purpose Room located at 3120 N. Red Mountain on Wednesday, September 05, 2018 between the hours of 7:00PM - 8:30PM. This open house will allow us to introduce ourselves and our proposal, as well as receive input and address any concerns that you may have. Your participation is important to us. If you are unable to attend, but have questions or wish to obtain information regarding the proposal, please contact:

Caitlin LaJoie, Development Coordinator
Continental Properties Company, Inc.
Email: clajoie@cproperties.com
Phone: 262-502-5500
Fax: 262-502-5522

Please give us the opportunity to address any specific questions and concerns of yours at the neighborhood meeting. We look forward to meeting you!

Sincerely,

A handwritten signature in cursive script that reads "Caitlin LaJoie".

Caitlin LaJoie
Development Coordinator
Continental Properties Company Inc.

Exhibit E - 1st Neighborhood Meeting Summary

Neighborhood Meeting Summary Continental Properties Springs at Mesa S. of SEC of Power Rd. and McKellips Rd.

Date: September 5, 2018

Location:
Las Sendas Elementary School MPR
3120 N. Red Mountain
Mesa, AZ 85215

The meeting started at 7:00 pm and ended at approximately 8:10 pm.

Citizens Present: 7 (5 signed in)

Development Team Present: 4

The meeting was an open house format with the developer/applicant Eric Gumm, Erin, and Reese Anderson, and D.J. Stapley from Pew & Lake, PLC welcoming attendees and describing the project at the plans on display.

Exhibits Presented: Color preliminary site plan/aerial map, architectural renderings, design concept exhibits, zoning context map

Neighborhood Meeting Summary:

1. Regarding the product type, Springs at Mesa is a high end rental apartment development primarily catering to young professionals, small families, empty nesters, and retiring seniors. The variety and style of the architectural design and materials make this a high-quality product. Each unit, including those on the second story, will have individual, private access points to the unit, and many of the units will have garages or shaded canopy parking. There will be no common corridors or breezeways and ample open space area.
2. In relation to the zoning and request, the Applicant is requesting a modification to the site plan and Planned Area Development (PAD) zoning. The current zoning is RM-3 PAD, which is multiple residence residential with a maximum 20 dwelling units per acre. The Applicant does not seek to change the base zoning, since Springs at Mesa complies with the density of the base zoning, the preliminary site plan being 18.67 units/acre. The PAD modification is needed to approve the new site plan.

As to zoning history, in 1990, the subject property was zoned commercial. Then, in 2005, the property was rezoned to accommodate the 3-story condominiums. Over time, after analyzing the neighborhood and market, the Applicant determined that 2-story buildings under per the proposed design would be more appropriate for the subject property.

3. Answering questions about timing, the application has not been formally submitted yet. This neighborhood meeting was designed to meet with the neighbors early on. There will be multiple opportunities to meet during this process. In October, the application will be

filed. The zoning process could take approximately 6 months, and then there will be the building permit process.

4. Regarding the duration of the construction process, actual construction will take about 18 months. First, construction will occur at the entry and emergency access to the north. Then it will work its way south and counter-clockwise, completing the south portion first. If the site plan and PAD modification are approved, construction could begin approximately 1 year from now.
5. In response to a question about the project height and units, the Applicant explained that the height will be brought down to 2 stories, versus the previously approved 35 foot high 3-story condos that this will replace. The proposed height of the Springs at Mesa will be 19 feet to each unit's upper ceiling height, plus some additional space for the rafters. The proposed total units is 196, up from the previously proposed 144, although they will be clustered into fewer buildings with private access points for each unit.
6. Further detailing the project's target market, the Applicant explained that Springs at Mesa is a market-rate development. Its projected rents are \$1,000/month for its studio units, \$1,200 to \$1,600/month for its 1-2 bedroom units, and \$1,800-\$1,900/month for its 3-bedroom units. The units will include high-quality interior features, such as granite countertops and aluminum appliances. The project emphasizes its 1-2 bedroom units, those making up approximately three-fourths of the units on the preliminary site plan.
7. Some neighbors asked about the project's impact on schools. The Applicant noted it will have minimal impact. Based on a study of Continental's 20,000 units across the country, only approximately 6% of its occupants are families with children between 6 and 18 in its 3 bedroom units. Generally, Mesa Public Schools has room to grow and welcomes new students.
8. One neighbor, who lives in a house abutting the subject property to the south, asked about the separation from the building to her house. The two buildings on the south portion of the subject property will be approximately a minimum of 40 feet from the homes to the south. Some of the buildings will be further than 40 feet, but that is the minimum. Those two buildings will have ample landscaping between them and the property line. Also, parking will not face the south property line. The garages for the two buildings will be located on the north side, and again, the heights will be two-stories, not three stories.
9. Addressing a question about pedestrian access, the Applicant noted it will enter the site at the Power Road entry west of the gate. A loop of pedestrian pathways will be circulate around the perimeter of the development, with several connections to the interior and the open space area between buildings 5 and 6.
10. Regarding vehicular access, ingress and egress will be right-in, right-out at Power Road to already approved easements at the Albertson's and LA Fitness properties. The subject property is odd shaped, with a long access drive to reach the site. However, this has the benefit of solving vehicular stacking issues at the entry gate.

In addition to the Albertson's access, vehicles traveling southbound on Power Road can access the site through the LA Fitness, which was designed years ago to accommodate traffic to both its property and this subject property. Vehicles entering LA Fitness

property will follow an access easement that leads to a traffic circle that LA Fitness built, which will manage access to and from both properties.

11. Two neighbors who live nearby explained they were concerned about vehicular access from southbound Power Road; U-turns; and the right-in, right-out scheme. They suggested a traffic light could reduce risks.

In response, the applicant noted the concern, and replied that the City of Mesa traffic engineering has likely studied traffic counts there and will monitor that issue. The applicant would like a median break; however, city standards do not permit that given there is not enough room for a left turn lane. There are too many driveways and walls along the nearby commercial uses that prevent a median break. Ultimately, though, the access easements, driveway circle, and long entry drive will help increase safety.

The proposed apartments have lower traffic demand than commercial uses. Residential uses have peak demand during the a.m. and p.m. commutes, whereas commercial uses have higher demand in general, and commercial traffic occurs throughout the day. Further, commercial buildings require more parking, versus the Applicant's typical 1.75 cars needed per unit. This proposed development exceeds the Applicant's typical count, because it complies with Mesa's standard of approximately 2.01 parking spaces per unit.

12. In response to whether there is water and sewer access, the Applicant stated that there are water, sewer, and utility connections available. Water will connect to two points at its east end.

Re: Follow-Up Neighborhood Meeting – Springs at Mesa
Mesa, AZ

Dear Neighbor:

As you may be aware, our company, Continental Properties Company, Inc. (“Continental”) held an informational neighborhood meeting on September 5, 2018 at the Las Sendas Elementary School for its proposed high-quality, market-rate multifamily community in Mesa, AZ. If you were able to join us at the informational meeting, thank you for attending and we greatly appreciate your feedback.

As a follow-up to the informational meeting held on September 5, 2018, Continental would like to extend an invitation for you to join us at Las Sendas Elementary School in the Media Center located at 3120 N. Red Mountain on Wednesday, October 3, 2018 at 6 p.m. This meeting will allow us to provide an update on the project and present some of the revisions we have made based on the questions and comments we’ve received from the first informational meeting.

In summary, Continental is working on a proposal to develop, own and operate a high-quality, market-rate multifamily community (“Community”) in Mesa, AZ. At approximately 10.50 acres in size, the vacant land is located approximately one quarter of a mile south of McDowell Road on the east side of Power Road; also known as Maricopa County Assessor Parcel No. 219-25-941. This property was previously zoned RM-3 (PAD), which stands for Residential Multiple Dwelling with a Planned Area Development overlay, but subsequently, that project was never developed. Our specific requests to the City are for a PAD amendment and Site Plan modification.

Your participation is important to us. If you are unable to attend but have questions or wish to obtain information regarding the proposal, please contact me at egumm@cproperties.com or 262-532-9332.

Please give us the opportunity to address any specific questions and concerns of yours at the neighborhood meeting. We look forward to meeting you!

Sincerely,

A handwritten signature in black ink that reads "Eric Gumm".

Eric Gumm
Development Director
Continental Properties Company Inc.

Exhibit L - 2nd Neighborhood Meeting Summary

Neighborhood Meeting Summary Continental Properties Springs at Mesa S. of SEC of Power Rd. and McKellips Rd.

Date: October 3, 2018

Location:
Las Sendas Elementary School – Library
3120 N. Red Mountain
Mesa, AZ 85215

The meeting started at 6:00 pm and ended at approximately 7:05 pm.

Citizens Present: 5 (3 signed in)

Development Team Present: 3 (Developer/applicant Eric Gumm; Reese Anderson and D.J. Stapley from Pew & Lake, PLC)

Exhibits Presented: Original and revised preliminary site plan; cross-sections showing distances to nearby residences to the south, concept plans

Neighborhood Meeting Summary

1. After careful consideration of the proposed plan and citizen comments, the developer revised the plan to reduce the number of buildings from 9 to 7. Also, the new plan moved the two south buildings further away from the south property line and added parking. More landscaping, retention, and trees are provided along the south property line.
2. The revised plan maintains the same number of units (196), which resulted in three-story buildings similar to the previously-approved plan from a few years ago. However, the developer is considering lowering the south buildings to two stories (buildings 2, 3, and 4), which could decrease the units to 192. Some neighbors indicated they prefer two-story buildings.
3. On proximity to the homes to the south, under the revised plan, the building separation to nearby homes was increased dramatically to approximately 135 ft. and 104 ft. Building 3 will have a parking aisle and covered parking structures between the building and the south property line. Building 4 will back onto a wide landscaped area and retention basin.
4. In response to questions about visibility to properties to the south, the applicant explained that more trees will be provided than shown on the preliminary plan. Two rows of trees will be added with special emphasis on staggered placement to screen views to the south. Tree type is unknown, but will comply with the City's drought-tolerant tree requirements. There are many options for trees with a screening effect.

Also, no entries or recreational amenities will be provided behind Building 4, the building located at the property's southeast corner. The retention basin and landscaping will make it a peaceful area.

5. Concerning maintenance, apartment management will actively maintain the trees and perimeter landscaping. The applicant acknowledged comments about current trespassing and littering that occurs. The proposed development will resolve that.
6. Addressing lighting, there will be no bright lighting as in commercial developments. The City requires minimal lighting of parking lots and pathways for security, but also in a manner that prevents lighting spill-over to neighboring properties. Lighting might be seen from a distance, but is not permitted to bleed over property lines. To comply, the area behind Building 4 will probably have low-level bollard pathway lighting that is not more than 3 feet off the ground and directed downward. The rear sides of Building 4 will likely have limited low-level wall fixtures per Mesa's requirements. But again, the light boxes will shield the light and direct it downward.
7. In response to a question about stormwater retention, the subject property is odd shaped, requiring some underground retention. Also, some retention will be provided in retention basins, and part of the surface flow will be connected to the City's storm drain system and will comply with engineering requirements.
8. When asked about perimeter walls, the applicant noted that the property already has approximately 6-foot masonry block walls on every side minus the canal frontage, which heights are typical of Mesa's standards. The only new perimeter wall will be built along the canal. The applicant does not plan to raise existing walls given the potential liability and possible structural issues associated with raising the height.
9. Regarding the total number of people in Building 4, the 3-story concept will have approximately 28 apartments, or fewer with the 2-story plan, with 1.5 people average per unit. Access will be limited to the north side of the building at the southeast corner.
10. The applicant acknowledged a comment that some views to distant mountains to the north might be blocked. In some cases, such views already somewhat limited by the height of rear yard walls.
11. When asked about apartments south of Power Road, the applicant replied that they are at 96% occupancy, which is deemed full occupancy in the industry.
12. Two neighbors requested an update regarding traffic congestion and limited access. They requested whether alternatives were feasible, such as a full median break, traffic light, or two-way left-turn lanes. The applicant outlined the access plan in place since the development of surrounding properties. The Traffic Department has standards that must be complied with to ensure maximum possible safety given the multiple nearby driveways. After the last citizen meeting, the applicant met with City staff and reported the traffic concerns, but has not heard back. This project's formal application has not yet been submitted, so there is still time for the all parties to consider the traffic issues.
13. Regarding timing and process, the formal application will be submitted at the end of October or November. Then, it is an approximately 5-6 month long zoning process concluding at City Council. Sometime after submitting, the applicant will hold another citizen meeting to give an update on the project's status.

Mesa, AZ 85211-1466

Jessica Potter
City Council Assistant
20 E Main Street, Suite 750
PO Box 1466
Mesa, AZ 85211-1466

Dear Vice Mayor Luna & Ms. Jessica Potter,

This letter is being sent to report on the citizen outreach efforts we have performed for our proposed multi-family community known as Springs at Red Mountain, located approximately one quarter mile south of the SEC of Power Road and McDowell Road (APN 219-25-941).

We have held two neighborhood meetings at Las Sendas Elementary School on September 5 and October 3, 2018, both at 6:00 p.m., which gave us the opportunity to present information to neighbors and respond to their questions and comments. Our neighborhood meeting notification complied with City of Mesa standards, even though a formal submittal had not yet been made. The notification list for the first meeting included property owners within 1,000 feet of the subject property and HOAs within one-half mile. For our second neighborhood meeting, we notified those who attended the first meeting and property owners located on both sides of the abutting street to the south of the property. We anticipate filing the formal submittal soon.

At the first neighborhood meeting, seven (7) individuals were present, as shown on the enclosed sign-in sheet (**Exhibit A**). After presenting the site plan (**Exhibit B**) and other drawings, the enclosed summary minutes (**Exhibit C**) indicate that some of the main concerns discussed were regarding (a) the multi-family product type, (b) building setbacks and privacy, and (c) traffic and parking. In response to the issues raised at the September 5 neighborhood meeting, we modified the preliminary development plan (**Exhibit D**), which changes can be summarized as follows:

- a. We reduced the total building count from nine (9) two-story buildings to seven (7) three-story buildings at the same total unit count of one hundred ninety-six (196) units. The proposed building heights are thirty-nine (39) feet, which is below the maximum allowed (40) feet and similar to the thirty-five-foot (35-ft.) height previously approved in the 2005 PAD. We will note below that we later reduced the height of three (3) of these buildings to two (2) stories.
- b. Reducing the building count resulted in a larger building setback to the south. Where the September 5 site plan provided an approximately 30-40-foot south setback, the revised building setbacks in the October 3 plan were approximately 45 feet and 108 feet from the south property line (**Exhibit E**). It is noted that this does not count the additional space between the south property line and the homes to the south.
- c. The landscape buffer on the south was likewise increased, which significantly increased the number of trees between the proposed buildings and the homes to the south.

- d. We increased onsite parking from 2.01 parking spaces per unit to 2.10 spaces per unit, which is compliant with the Mesa Zoning Ordinance, thus avoiding any request for a parking deviation.
- e. The revised site plan also includes more open space. Open space amenities still include a perimeter walking trail, pet playground, pedestrian connection to the adjacent retail and canal, pergolas, grilling stations, and a fire pit. Continental will also offer a concierge trash service where on-site staff will collect and dispose of trash from the individual units for tenants.

As noted above, we presented these modified plans at the follow-up neighborhood meeting on October 3rd, in which five (5) neighbors attended. The following topics were discussed, some of which were similar to those raised at the first meeting: (a) building heights, (b) building setbacks and privacy, and (c) traffic in the area.

In response to the comments at the second meeting, we lowered the height of the three (3) southern-most buildings from three (3) stories to two (2) stories, which mitigates perceived impacts to the properties to the south. Also, we lowered the total unit count by four (4) units to a total of one hundred ninety-two (192) units. The reduced building height, reduced unit count, when combined with the increased building setbacks, parking, landscape buffers, and amenities will help address some of the concerns offered by the adjacent residents.

We are hopeful that our early citizen outreach and plan revisions will help facilitate a fair and transparent public process. Looking ahead, Continental will continue to work with the neighboring community throughout the entitlement process.

Please feel free to call or email me at any time with questions or comments.

Sincerely,

A handwritten signature in black ink that reads "Eric Gumm". The signature is written in a cursive, flowing style.

Neighborhood Meeting Minutes

Neighborhood Meeting Summary
Continental Properties
Springs at Mesa
S. of SEC of Power Rd. and McKellips Rd.

September 5, 2018

Location:

Las Sendas Elementary School MPR
3120 N Red Mountain
Mesa, AZ 85215

The meeting started at 7:00 pm and ended at approximately 8:10 pm

Citizens Present: 7

Development Team Present: 4

The meeting was an open house format with the developer/applicant Eric Gumm, Erin Conway, and Reese Anderson, and D.J. Stapley from Pew & Lake, PLC welcoming attendees and describing the project at the plans on display.

Exhibits Presented: Color preliminary site plan/aerial map, architectural renderings, design concept exhibits, zoning context map

Neighborhood Meeting Summary:

1. Regarding the product type, Springs at Mesa is a high-end rental apartment development primarily catering to young professionals, small families, empty nesters, and retiring seniors. The variety and style of the architectural design and materials make this a high-quality product. Each unit, including those on the second story, will have individual, private access points to the unit, and many of the units will have garages or shaded canopy parking. There will be no common corridors or breezeways and ample open space area.
2. In relation to the zoning and request, the Applicant is requesting a modification to the site plan and Planned Area Development (PAD) zoning. The current zoning is RM-3 PAD, which is multiple residence residential with a maximum 20 dwelling units per acre. The Applicant does not seek to change the base zoning, since Springs at Mesa complies with the density of the base zoning, the preliminary site plan being approximately 18.67 units/acre. The PAD modification is needed to approve the new site plan.

As to zoning history, in 1990, the subject property was zoned commercial. Then, in 2005, the property was rezoned to accommodate the 3-story condominiums. Over time, after analyzing the neighborhood and market, the Applicant determined that 2-story buildings under per the proposed design would be more appropriate for the subject property.

3. Answering questions about timing, the application has not been formally submitted yet. This neighborhood meeting was designed to meet with the neighbors early on. There will be multiple opportunities to meet during this process. In October, the application will be

filed. The zoning process could take approximately 6 months, and then there will be the building permit process.

4. Regarding the duration of the construction process, actual construction will take about 18 months. First, construction will occur at the entry and emergency access to the north. Then it will work its way south and counter-clockwise, completing the south portion first. If the site plan and PAD modification are approved, construction could begin approximately 1 year from now.
5. In response to a question about the project height and units, the Applicant explained that the height will be brought down to 2 stories, versus the previously approved 35 foot high 3-story condos that this will replace. The proposed height of the Springs at Mesa will be 19 feet to each unit's upper ceiling height, plus some additional space for the rafters. The proposed total units is 196 units, up from the previously proposed 144, although they will be clustered into fewer buildings with private access points for each unit.
6. Further detailing the project's target market, the Applicant explained that Springs at Mesa is a market-rate development. Its projected rents are \$1,000/month for its studio units, \$1,200 to \$1,600/month for its 1-2 bedroom units, and \$1,800-\$1,900/month for its 3-bedroom units. The units will include high-quality interior features, such as granite countertops and aluminum appliances. The project emphasizes its 1-2 bedroom units, those making up approximately three-fourths of the units on the preliminary site plan.
7. Some neighbors asked about the project's impact on schools. The Applicant noted it will have minimal impact. Based on a study of Continental's 20,000 units across the country, only approximately 6% of its occupants are families with children between 6 and 18 in its 3-bedroom units. Generally, Mesa Public Schools has room to grow and welcomes new students.
8. One neighbor, who lives in a house abutting the subject property to the south, asked about the separation from the building to her house. The two buildings on the south portion of the subject property will be a maximum 40 feet from the homes to the south. Some of the buildings will be further than 40 feet, but that is the minimum. Those two buildings will have ample landscaping between them and the property line. Also, parking will not face the south property line. The garages for the two buildings will be located on the north side, and again, the heights will be two-stories, not three stories.
9. Addressing a question about pedestrian access, the Applicant noted it will enter the site at the Power Road entry west of the gate. A loop of pedestrian pathways will be circulate around the perimeter of the development, with several connections to the interior and the open space area between buildings 5 and 6.
10. Regarding vehicular access, ingress and egress will be right-in, right-out at Power Road to already approved easements at the Albertson's and LA Fitness properties. The subject property is odd shaped, with a long access drive to reach the site. However, this has the benefit of solving vehicular stacking issues at the entry gate.

In addition to the Albertson's access, vehicles traveling southbound on Power Road can access the site through the LA Fitness, which was designed years ago to accommodate traffic to both its property and this subject property. Vehicles entering LA Fitness

property will follow an access easement that leads to a traffic circle that LA Fitness built, which will manage access to and from both properties.

11. Two neighbors who live nearby explained they were concerned about vehicular access from southbound Power Road; U-turns; and the right-in, right-out scheme. They suggested a traffic light could reduce risks.

In response, the Applicant noted the concern, and replied that the City of Mesa traffic engineering has likely studied traffic counts there and will monitor that issue. The applicant would like a median break; however, city standards do not permit that given there is not enough room for a left turn lane. There are too many driveways and walls along the nearby commercial uses that prevent a median break. Ultimately, though, the access easements, driveway circle, and long entry drive will help increase safety.

The proposed apartments have lower traffic demand than commercial uses. Residential uses have peak demand during the a.m. and p.m. commutes, whereas commercial uses have higher demand in general, and commercial traffic occurs throughout the day. Further, commercial buildings require more parking, versus the Applicant's typical 1.75 cars needed per unit. This proposed development exceeds the Applicant's typical parking count in effort to achieve Mesa's standard of approximately 2.10 parking spaces per unit.

12. In response to whether there is water and sewer access, the Applicant stated that there are water, sewer, and utility connections available. Water will connect to two points at its east end.
