

City Council Report

Date: March 2, 2015
To: City Council
Through: Alex Deshuk, Manager of Technology and Innovation
From: Edward Quedens, MPA, C.P.M., CPPO, Business Services Director
Matt Bauer, MBA, CPPO, CPPB, CPSM, Procurement Administrator
Subject: Purchase of Replacement Uninterruptable Power Supply Devices and Network Management Cards as requested by the Information Technology Department **(Citywide)**

Purpose and Recommendation

Council is requested to approve the purchase of Uninterruptible Power Supply Devices and Network Management Cards as recommended.

Information Technology and Purchasing recommend authorizing the purchase using the State of Arizona cooperative contract with Insight Public Sector at \$58,214.02.

Background / Discussion

Uninterruptable Power Supply (UPS) devices are designed to work when primary Utility power is temporarily interrupted. These devices act as transitional power until the utility power is restored. UPS devices are located in building equipment rooms across the City and are used to retain power for telephone and computing services in the event of temporary loss of power. The network management cards are for proactive monitoring and performance of these devices.

This purchase will provide UPS replacements of an aging and poor performing fleet of UPS devices. Approximately half of the City's devices are at least five years old.

The State of Arizona has contracts with several vendors, including Insight Public Sector, CDW-G, and World Wide Technology Inc. The City obtained quotes from these State contract vendors. Insight Public Sector was the lowest bid and is being recommended for award. Using the cooperative contract is beneficial to the City due to the State's high volume discounted pricing.

Alternatives

Council may choose not to authorize the purchase and new bids will be obtained.

Fiscal Impact

The total amount of \$58,214.02 is funded by the Information Technology Department operating budget.
