**PROJECT DESCRIPTION/NARRATIVE:**

Arizona Propane  
Pecos Road

This project is for the relocation of the Arizona Propane main office. The rear of the site will be used for storage and refueling of the propane trucks. There will be a sand blast enclosure for sand blasting of parts. There are two future buildings that will be storage/garage uses. In the front of the building there will be a future propane dispenser for filling portable propane containers.

The rear of the site will be paved with recycled asphalt except for a 20' wide standard asphalt drive for fire truck and refuse trucks maneuvering, this area will be striped. The paving in the front of the building will be standard asphalt.

The office building will be a pre-engineered Butler building using stucco embossed metal panels and standing seam metal roof. The two future buildings will also be pre-engineered metal buildings.
