

I am completely against approval for the smart growth community plan at sycamore st and main st.

the average selling price of homes in the area is well under \$200k, and affordable senior housing is under \$800 per month.

The city has done nothing to fix up the neighborhood in the west mesa area (street repairs, alleyways, park area around ella and may streets and along the tempe canal from university and main streets).

The proposal would raise property taxes on the seniors on fixed income who are already way overtaxed, and traffic that is already too heavy would be made much worse. The number of sex offenders already moving into the area is already too high-time to put a quota out and have other zip codes in mesa share the responsibility.
