Revenue Forecasting Process

The city subscribes to a forecast group out of the University of Arizona which allows for access to raw data regarding econometrics

Statistical software is applied in house to analyze the correlation between economic trends and the City's revenue sources

Relevant economic indicators are considered such as: population growth, wages, unemployment, building permits, gas prices, etc.

Mesa specific factors are applied such as economic development activities, retail trends, etc.

Governmental Funds Operating Revenues

General Governmental revenues in the City of Mesa come from three primary sources:

**City sales and
use tax**

**State shared
revenues**

**Transfer from
the enterprise
fund**

Government Funds Operating Revenues

A standard economic cycle correction is anticipated during the forecast period and has not been included in the revenue amounts at this time. This issue will be addressed as part of the proposed budget.

Transfer from the Enterprise Fund

City's method of providing funding for general governmental services such as police and fire.

The City invests the net revenues from the utilities back into the city.

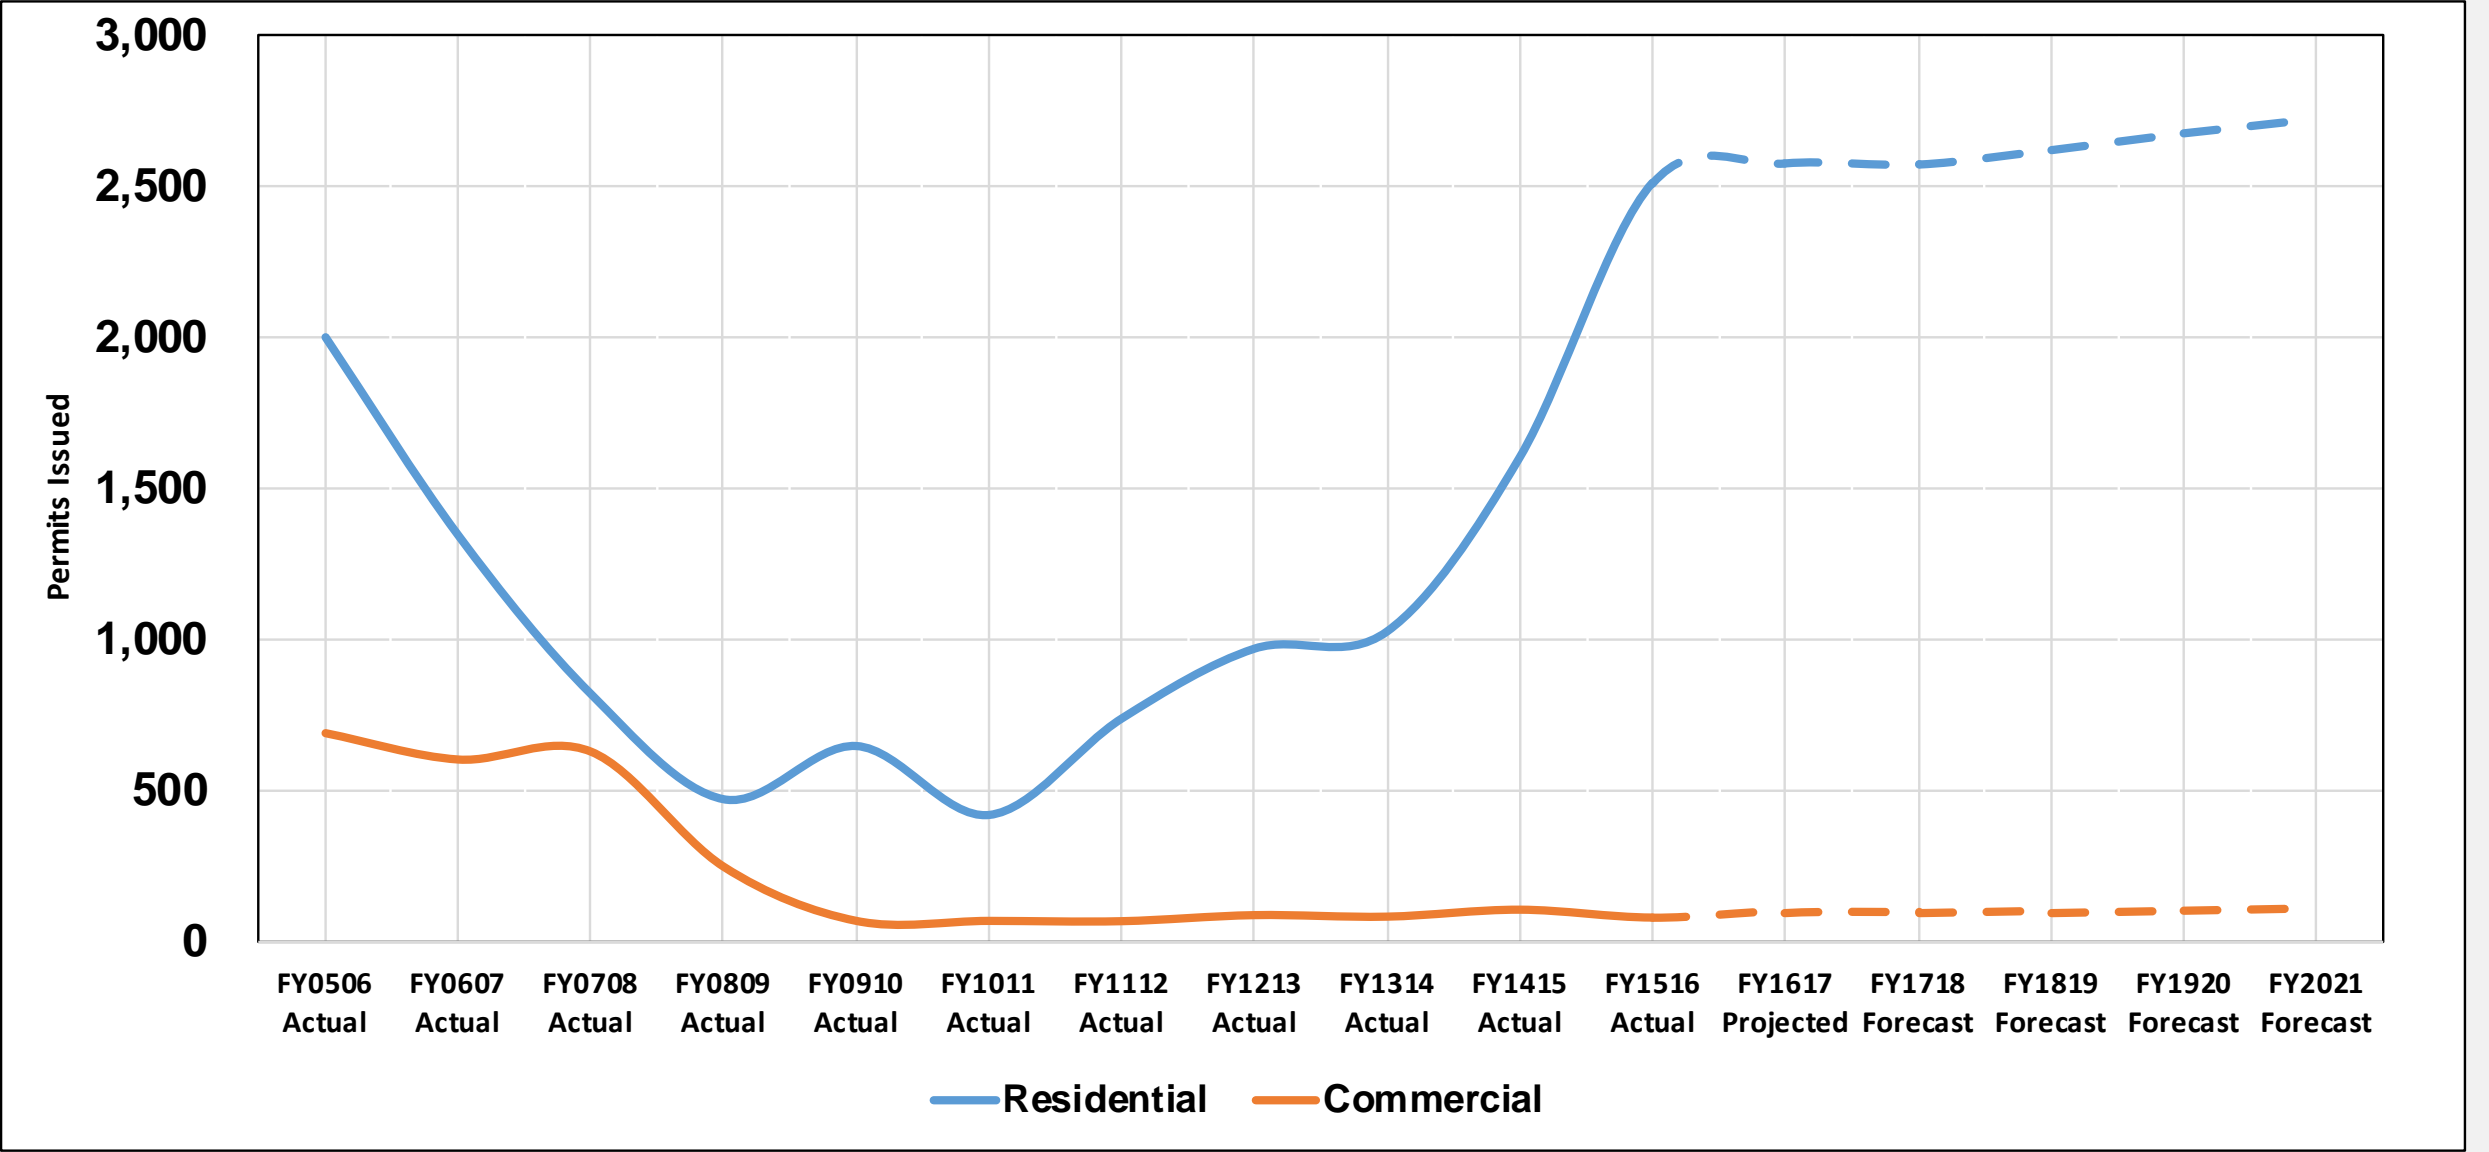

The FY17/18 forecast includes an increase to the transfer amount equal to the consumer price index (CPI) of 2.5%.

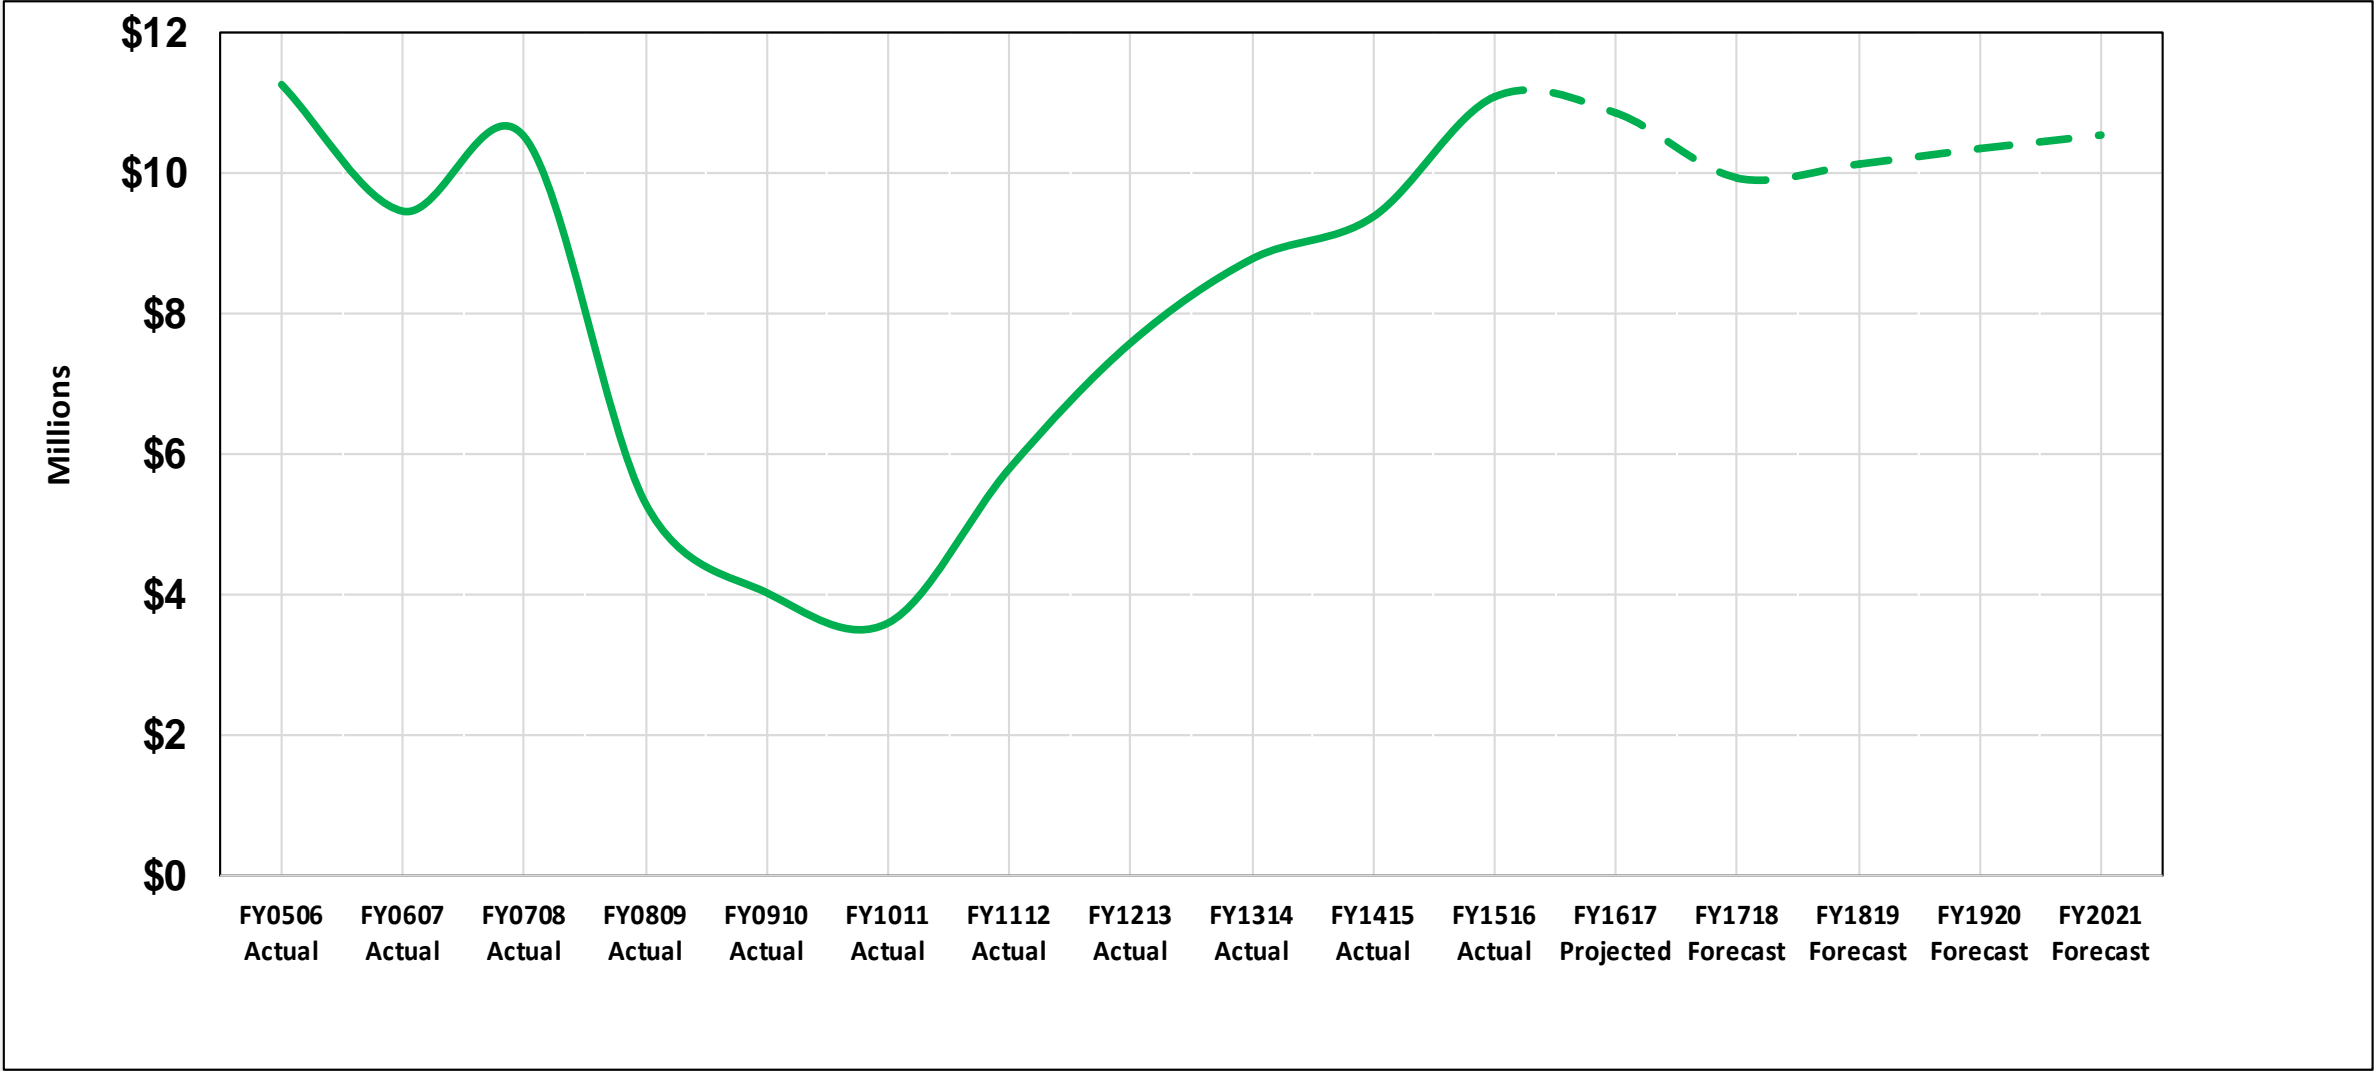

Building Permit Activity

- Monitoring Permit Activity is helpful as an economic indicator
- When permit activity increases, other revenues also tend to increase
- Commercial permit activity has slowed therefore permit revenues have decreased
