

- ## SITE PLAN

The image shows a large-scale model of a boat hull constructed from cardboard. The hull is laid out on a carpeted floor, showing its full length and width. The bow is on the right, tapering to a point. The stern is on the left, where a small rectangular structure is attached. Handwritten labels and arrows are visible on the cardboard, providing instructions for assembly and dimensions. For example, one label says "Front of House" with an arrow pointing to the left. Another label says "25' Front 50' wide" with an arrow pointing to the right. A third label says "25' x 60" with an arrow pointing to the width of the hull. The model is made of several pieces of cardboard, some of which are labeled with handwritten text and arrows indicating dimensions and assembly directions. The background shows a room with a door, a window with curtains, and a piece of furniture.
