

City Council Report

Date: July 1, 2020
To: City Council
Through: Michael Kennington, Deputy City Manager/Chief Financial Officer
From: Edward Quedens, Business Services Director
Matt Bauer, Procurement Administrator
Subject: Purchase of a Backup/Data Protection and Storage Solution (Replacement) for the Department of Innovation and Technology **(Funded by Lifecycle Funds) (Citywide)**

Recommendation

Council is requested to approve the award as recommended.

The Department of Innovation and Technology and Purchasing recommend authorizing the purchase using the Maricopa County cooperative contract and the lowest quoted vendor iT1 Source, at \$102,987.27, based on estimated requirements.

Background / Discussion

The backup data storage platform stores copies of the City's critical data and is required for data recovery from a disaster. These copies are vital to the reliable provision of City services.

The current Quantum backup storage device has reached the end of its serviceable life and needs to be replaced to ensure reliable backups are maintained. The requested device is more secure, performant and reliable, allowing the City to recover more quickly in the event of a disaster. The device will expand the current platform the City has been using for two years and address the immediate capacity needs required to retire the older Quantum platform.
