### Three-Year Term Contract for Refuse Container Bin Lids for the Solid Waste Management Department (**Citywide**)

This contract will provide 100% recyclable black lids that will be used for metal bin refuse containers for commercial customers throughout the City. The purchase is for approximately 1,500 large lids and 150 smaller lids annually. This contract will ensure Solid Waste Management readily has a supply of lids to meet the maintenance requirements of the City's bin inventory.

Solid Waste Management and Purchasing recommend awarding the contract to the lowest priced, responsive and responsible bidder, Plastic Recovery Technology, dba PRT, at \$29,100.00 annually, based on estimated requirements.
