### One-Year Renewal of the Term Contract for Fasteners, Hardware and Electrical Supplies for Fleet Services and various City Departments **(Citywide)**

This contract provides fasteners, related hardware and electrical supplies, which are commonly used for in an automotive repair facility, and general repairs for the Fleet Services, Fire, Communications and Water Resources Departments. The vendor is responsible for maintaining and supplying an inventory of the specific items and quantities as designated by the City. Fleet Services also uses onsite vending machines through this contract to distribute small parts and supplies. A new contract is being developed to replace this contract including vending machines for citywide department use.

Fleet Services and Purchasing recommend authorizing a one-year renewal with Fastenal Company (a Mesa business), at \$78,000.00 annually, based on estimated requirements.
