### Three-Year Term Contract for Siemens Ruggedized Switches for the Transportation and Information Technology Departments **(Citywide)**

This contract supports the planned lifecycle replacement of network switches that provide connectivity for remote sites for the City's SCADA (Supervisory Control and Data Acquisition) environment as well as Transportation ITS (Intelligence Transportation System). These ruggedized switches also provide the security management and monitoring controls needed to mitigate security vulnerabilities and address communication errors occurring in current, aging devices.

The Transportation and Information Technology Departments, and Purchasing recommend awarding a contract to the lowest, responsive and responsible bidders: TESSCO Incorporated; and L4 Technologies, LLC; cumulatively not to exceed \$200,000 annually, based on estimated requirements.
