Replacement/Upgrade Purchase of Storage Infrastructure Components for the Information Technology Department **(Citywide)**

These purchases are part of the City's Lifecycle Management Program to replace aging hardware and software that has reached the end of its supportable life. These purchases will provide a highly available storage and backup platform that provides improved performance, lower operating costs, using less space and power, while providing a backup platform that safeguards critical data and applications.

The Information Technology Department and Purchasing recommend authorizing the purchase using the State of Arizona and Maricopa County cooperative contracts with the lowest-quoted vendor, iT1 Source, for \$333,685.71. This purchase is funded by the Lifecycle Management Program budget.
