File #: 18-1013, **Version:** 1

Purchase of 42 Replacement Scott Safety Powered Air Purifying Respirators (PAPR) and 200 Scott Air Purifying Cartridges for the Fire and Medical Department **(Citywide)**

This purchase will replace outdated PAPRs that are carried on Fire and Medical's heavy rescue and mass decontamination units. PAPRs protect the first responder's respiratory system from harmful contaminants and allow for longer work cycles with full face mask backpressure protection.

The Fire and Medical Department and Purchasing recommend awarding the contract to the single, responsive and responsible bidder, Municipal Emergency Services, at \$51,653.41. This purchase is funded by the State Homeland Security Grant Program.
