Three-Year Term Contract with Two Years of Renewal Options for Endress+Hauser Analytical Equipment and Supplies for the Water Resources Department (Single Response) **(Citywide)**

The City currently owns and operates Endress+Hauser industrial automation equipment at the City's water and wastewater plants. This equipment is proprietary technology.

An evaluation committee recommends awarding the contract to the single and responsive proposal from Endress+Hauser, Inc., at \$100,000 annually, with an annual increase allowance of up to 5%, or the adjusted Consumer Price Index.
