File #: 20-0106, **Version:** 1

Purchase of a High Availability Data Storage System (Replacement) for the Information Technology Department (**Citywide**)

The high availability data storage system contains critical data used by computer applications that serve both Mesa citizens and internal City business needs. The data stored on these systems is vital to the provision of City services. The current data storage system has reached the end of the serviceable life and needs to be replaced to ensure continued reliable operation.

The Information Technology Department and Purchasing recommend authorizing the purchase using the State of Arizona cooperative contract and the lowest-quoted vendor, iT1 Source, LLC, at \$164,796.33, based on estimated requirements.
