## UTILITY SERVICE FEE SCHEDULE

Utility service fees work in conjunction with utility rates and charges to offset the cost of delivering public services. The utility service fee schedule is organized into two sections. First, fees in the customer relationship management section recover the cost of using existing facilities. Second, fees in the land management section recover the cost of adding new facilities to the utility system. Utility service fees are listed for new connection and metering facilities. Other fees to recover the cost of growth are listed by cross reference to system development agreements and impact fees.
