R-7901 Steel Bollard

The R-7901 Steel Bollard features a clean, versatile design and a range of custom mounting options, making it suitable for any site location. R-7901 bollards are made from carbon steel and powder coated to prevent corrosion and wear, or upgrade to IronArmor coating for added protection. Optional reflector stripes are available. Select from several fixed and removable mounting options: concrete embedment, bolt-down flange, removable receivers and fold-down mountings.

Looking for taller bollards? We have a limited quantity of 42" R-7901s. Please contact sales if you are interested.
