

Project Narrative

Tower Height Increase at Mesa Golfland/Sunsplash

The upcoming project is adding a new water slide and stair tower. This new attraction will be installed in the open grass area located to the southeast of the “Thunder Bay” wave pool in between the white water slides and the double dare run out that is adjacent to the Motel 6.

Landscaping around the new attraction will match that of the rest of the park. No portions of this new attraction will be against any ADOT easement.

The height of this tower will be approximately 80 feet. Current drawings and plans for the upcoming project are not complete but will be submitted for new permitting as soon as available.
