TASER 10 – What we're trying to solve...

TASER 7 causes of in-effective deployments

1. Miss

- ✓ 10 cartridges
- ✓ Enhanced accuracy
- ✓ Single trigger, single shot

2. Limited spread & probe pulled free

- ✓ 10 cartridges
- ✓ Enhanced accuracy
- ✓ Single trigger, single shot (*create your own spread*)

3. Loose or thick clothing

- ✓ 10 cartridges
- ✓ Enhanced accuracy
- ✓ Single trigger, single shot
- ✓ Enhanced penetration

Every second counts

With a maximum range of 45 feet, TASER 10 creates more time and space to de-escalate and resolve conflicts.

When de-escalation fails, TASER 10 can deploy up to 10 individually target probes without the need to reload.

Nearly double the range of previous TASER energy weapons.

Holster and Unholster Tracking and Reporting

- TASER 10 detects when it's withdrawn or put back into specifically designed holsters
- This status is tracked and uploaded to Axon Evidence and reported as part of the weapon logs available to the user

The background of the image is a large, faded, and semi-transparent version of the Arizona Department of Education logo. The logo features a central shield with a landscape scene including a sun, mountains, and a river. Above the shield is a banner with the word "ARIZONA". The shield is held by two hands. The entire logo is enclosed in a circular border with the text "ARIZONA DEPARTMENT OF EDUCATION" and "BASIC AGENCY" visible at the bottom.
