

COUNCIL MINUTES

October 23, 2025

The City Council of the City of Mesa met in the Study Session room at City Hall, 20 East Main Street, on October 23, 2025, at 7:30 a.m.

COUNCIL PRESENT

Mark Freeman
Scott Somers
Rich Adams*
Jennifer Duff
Alicia Goforth
Francisco Heredia
Julie Spilsbury

COUNCIL ABSENT

None

OFFICERS PRESENT

Scott Butler
Holly Moseley
Jim Smith

(*Participated in the meeting through the use of video conference equipment.)

Mayor Freeman conducted a roll call.

Mayor Freeman excused Councilmember Goforth from the beginning of the meeting; she arrived at 7:37 a.m.

Mayor Freeman excused Councilmember Adams from the beginning of the meeting; he arrived at 7:57 a.m.

Mayor Freeman welcomed Mayor Cordova and staff from the City of Guaymas, Sonora, Mexico, acknowledged the ongoing sister city relationship, emphasizing the long-standing collaboration and friendship, and shared appreciation for the continued partnership.

Councilmember Heredia expressed his appreciation to the delegation from Guaymas and stated that it was an honor to host them during the week of Día de los Muertos.

1-a. Hear a presentation and discuss a draft Downtown Mesa Micromobility and Parking Plan.

Manager of Urban Transformation Jeff McVay introduced Urban Transformation Project Managers Jimmy Cerracchio and Anthony Rodriguez, and displayed a PowerPoint presentation. **(See Attachment 1)**

Mr. McVay explained that the proposed Downtown Micromobility Plan is intended to be a policy and planning document to guide future implementation of micromobility and transportation improvement in the downtown area. He noted that the plan is not an engineering study; therefore, certain technical details are not included and will require additional analysis and engineering

efforts in the future. He emphasized the importance of understanding the plan's purpose and stated that implementation details will be discussed further in the presentation.

Mr. Cerracchio reported that with the significant development occurring in the downtown area, the Downtown Micromobility Plan aims to evaluate multimodal transportation options to provide a connection to the downtown core with a focus on improving last-mile connections and enhancing the link to adjacent neighborhoods. He pointed out that the plan also examines the parking supply and strategies to better utilize available spaces while improving the overall visitor and resident experience downtown. He discussed the project goals which focus on access, safety, and comfort. (See Page 2 of Attachment 1)

Mr. Cerracchio reported that significant public outreach had been conducted by Stantec, the project consultant. He listed the various public meetings and engagement efforts conducted between fall 2024 and March 2025, as well as visits to the project's Mesa Listens webpage. He noted the March 2025 Council Study Session where draft recommendations were presented to the Mayor and Council for discussion. (See Page 3 of Attachment 1)

Mr. Cerracchio provided an overview of the existing conditions in Downtown Mesa. He noted that while average urban streets typically range from 38 to 46 feet in width, Downtown Mesa streets measure between 60 and 90 feet wide, with major thoroughfares such as Country Club Avenue reaching up to 93 feet. He explained that many streets include underutilized turn lanes, which add unnecessary width and reinforce drivers' perception of low risk. He also highlighted the limited bicycle infrastructure, including the lack of dedicated bike lanes and protective barriers, and emphasized the need for safety-focused improvements. (See Pages 5 and 6 of Attachment 1)

Mr. Cerracchio noted that downtown blocks are unusually long, measuring 600 to 700 feet, and many lack shade, reducing pedestrian comfort. He emphasized the importance of creating a safe, comfortable, and engaging pedestrian environment, citing features such as patios, active storefronts, public art, lighting, and shade structures. He also reviewed the crosswalk inventory and noted that while not every intersection requires a crosswalk, additional crossings in key locations could enhance pedestrian safety and connectivity. (See Page 7 of Attachment 1)

Mr. Cerracchio explained that downtown does not lack parking, citing approximately 6,400 public spaces that are typically underutilized. He noted that confusion over parking regulations and wayfinding contributes to the perception of limited availability and recommended simplifying signage and providing clearer messaging. He added that the previous color-coded parking system will be replaced with a universal blue symbol and suggested exploring designated rideshare zones to improve safety and traffic flow. (See Page 8 of Attachment 1)

Discussion ensued regarding access to parking downtown.

Mr. Rodriguez summarized the recommendations provided by the consultant. He discussed parking reform and highlighted the ideal options for downtown parking. He recalled that the plan recommended adding additional on-street parking as a high-turnover resource, public off-street parking for longer-term users, and the exploration of opportunities for shared parking agreements with private partners to increase overall efficiency. (See Pages 10 through 13 of Attachment 1)

Mr. Rodriguez reviewed the recommendation for right sizing our road network and provided an overview of the proposed street design improvements, which included the replacement of unnecessary left-turn lanes with designated turn pockets at key intersections, the reduction of lane widths where appropriate to maintain 12-foot lanes in areas with angled parking, and 10-foot

lanes elsewhere. He highlighted the option to add micromobility lanes, hubs for bike and scooter parking, and dedicated pickup and drop off zones to enhance rideshare access and circulation. He compared the existing and proposed road networks and described recommendations to reposition traffic signals for improved traffic flow. He noted that the plan also recommends enhancing wayfinding through a comprehensive, downtown-wide signage study to address both vehicle and pedestrian users and to guide visitors to key attractions and parking areas. (See Pages 14 through 18 of Attachment 1)

Mr. McVay reported that several parking improvements are already in progress in coordination with the Transportation Department, including pavement preservation and re-striping efforts. He noted that while some actions can be implemented immediately, others will require further study and funding through a future Capital Improvement Program, particularly infrastructure upgrades such as streetlight and traffic signal replacements. He reiterated that the plan serves as a guiding framework for implementation and highlighted the need to coordinate with related initiatives, including upcoming discussions on e-bikes, to ensure cohesive and integrated outcomes.

Mr. Rodriguez outlined the phased implementation strategy, noting that short-term efforts focus on low-cost improvements such as enhancing access to daily parking passes, designating rideshare pickup and drop-off zones, and coordinating with the Transportation Department on striping and micromobility parking. He continued by saying that the mid-term priorities include a downtown wayfinding study and monitoring permit demand to guide future parking expansion, and the long-term goals involve higher-cost investments, including curb and street modifications to improve micromobility connections and exploring paid parking and a parking benefit district. (See Pages 20 and 21 of Attachment 1)

Mr. Rodriguez stated that the plan is scheduled for Council adoption on November 17, 2025. He confirmed that, following adoption, the Transportation Department will begin its downtown mill and overlay program and advance implementation of the recommended striping plan. (See Page 22 of Attachment 1)

Councilmember Duff expressed strong support for the plan and emphasized the importance of walkability and micromobility in creating a vibrant downtown. She noted that downtown density is rapidly increasing with new residential developments and pointed out that enhancing mobility options for all ages will improve quality of life and economic vitality in Downtown Mesa.

In response to a question from Councilmember Heredia, Mr. McVay explained that the City has standardized its parking directional signage using a consistent blue "P" design to improve clarity but acknowledged the need for a broader wayfinding strategy to guide visitors to parking locations. He noted that a comprehensive wayfinding program would require additional study and moderate capital investment, and that the City plans to align the downtown effort with a citywide initiative led by the Planning Department to ensure consistency in branding and design. He stated that current parking demand does not justify implementation of a paid parking system and cautioned that introducing it prematurely could negatively impact downtown activity. He emphasized that any future consideration of paid parking would involve extensive engagement with businesses, stakeholders, and the Council.

Responding to a question from Councilmember Adams, Mr. McVay confirmed that improved arrival signage at parking lots will be a key next step to clearly communicate parking rules, such as back-in parking requirements. He noted that current signage often lacks clarity, leading many drivers to learn the rules only after receiving a warning or citation, and emphasized the need for better on-site communication to prevent confusion.

Replying to a comment from Councilmember Spilsbury, Mr. McVay acknowledged challenges with designing effective arrival signage and explained that staff are working to identify clearer messaging and placement to improve visibility and understanding.

In response to a question from Councilmember Spilsbury, Interim Transportation Director Erik Guderian outlined the schedule for the downtown mill and overlay program, noting it will be completed over four years to minimize disruption. He clarified that certain streets, such as Center Street, will not be impacted during this period due to upcoming projects, and that streets with diagonal pull-in parking and curb bump-outs, such as Hibbert and McDonald, will require further discussion with business owners before modifications can be implemented.

Responding to a comment from Councilmember Goforth, Mr. McVay committed to bringing the plan back to Council on November 17th with detailed timelines for parking improvement implementation.

Additional discussion ensued regarding downtown parking.

Councilmember Duff pointed out that a public meeting will be held on Monday, October 27, 2025, at 6:00 p.m. at The Post to discuss and receive feedback about this subject.

Mayor Freeman thanked staff for the presentation.

1-b. Hear a presentation and discuss Mesa's programming and budget for Parks and Recreation.

Parks, Recreation and Community Facilities (PRCF) Director Andrea Moore displayed a PowerPoint presentation. **(See Attachment 2)**

Ms. Moore provided an overview of the Recreation Division and its role within the department's \$57.8 million FY 25/26 budget, which includes 209 full-time and 112 part-time positions, supported by over 700 seasonal staff. She confirmed that the division's programs align with Council strategic priorities, including placemaking, community health and safety, youth and workforce development, economic development, and sustainability. She noted that recreation programs touch nearly every community segment, with offerings such as adaptive programming for individuals with additional needs, youth athletics, and field rentals for affiliated youth groups. She emphasized the department's intent to engage Council in dialogue regarding FY 26/27 budget priorities, fee structures, and program subsidies to ensure equitable community access while managing the impact on the General Fund. (See Pages 2 through 12 of Attachment 2)

Ms. Moore summarized the department operations and reported that much of the budget supports maintenance of parks, basins, sports fields, and pools, and reviewed the associated costs. She pointed out that facility maintenance for buildings and recreation centers is managed separately and is not included in the \$54 million budget. She highlighted the broad community impact of the department's programs, citing attendance of over 3 million people at PRCF programs and facilities. (See Pages 13 and 14 of Attachment 2)

Ms. Moore reviewed department expenditures and the impact of potential budget reductions. She noted that 53% of the budget is dedicated to maintaining facilities to ensure safety and long-term use, leaving limited flexibility for cuts. She clarified that recreation programs, which comprise about 30% of the budget, are most affected by reductions, as they can be scaled back without compromising facility safety. (See Page 15 of Attachment 2)

In response to a question from Councilmember Spilsbury, Ms. Moore discussed potential options to reduce the park maintenance costs but noted that the implications of such cuts would not be feasible without compromising facility safety and quality.

Ms. Moore discussed the expenditures across the department's three major divisions, including salaries, utilities, contracts, and other costs. She explained that other expenses are approximately 15% of the budget and cover items such as replacement parts, equipment, and playground repairs. (See Page 16 of Attachment 2)

Responding to a question from Councilmember Spilsbury, Ms. Moore emphasized that the COM assumes responsibility for park safety, making it impractical to delegate maintenance to volunteers or resident groups.

In response to a question from Councilmember Goforth, Ms. Moore noted that it is difficult to compare the COM to other municipalities because of the many variables involved, such as differences in park acreage, facility types, service levels, and programming models.

Ms. Moore explained that 41% of recreation revenue comes from rentals, primarily through affiliated youth groups that receive subsidized rates if they are Mesa residents, and 37% of revenue comes from program registrations, which provide introductory-level recreation opportunities and out-of-school care. She noted that these two categories together make up most of the department's recreation revenue. She reminded Council that rental rate increases were previously discussed but not adopted, and she requested further direction on the City's fee philosophy as staff prepares to revisit potential fee adjustments to reduce reliance on the General Fund. (See Page 17 of Attachment 2)

Additional discussion ensued regarding possible options to reduce park maintenance costs.

Ms. Moore presented the department's cost recovery and recent budget adjustments and confirmed that, overall, the department recovers about 30% of its budget through revenue, with field sports rentals generating the highest income and achieving near full cost recovery. She explained that indoor programming has the greatest demand but also the highest cost and the fewest available facilities and pointed out that rentals generate the largest share of revenue and help offset lower cost recovery from general programming and admissions. She added that affiliated youth groups and intergovernmental agreements, such as those with Mesa Public Schools, represent the largest users of fields and pools. (See Pages 18 through 21 of Attachment 2)

Ms. Moore outlined the cost-saving measures and fee adjustments implemented for the current budget year, including closing facilities on holidays, consolidating swim lesson times, and increasing select rental and admission fees. She stated that staff did not raise youth program fees or close Fremont Pool, maintaining community access and affordability. (See Pages 22 and 23 of Attachment 2)

In response to a comment from Councilmember Spilsbury, City Manager Scott Butler acknowledged the difficulty of balancing budget reductions across departments, emphasizing that any cuts would affect community services in some way. He stated that while staff continues to identify efficiencies citywide, reductions are not applied equally since Council makes intentional decisions about which programs to preserve or adjust. He commended the PRCF staff for their data-driven approach to identifying reasonable adjustments based on benchmarking and market

demand while maintaining essential community services and stressed that while the City could adopt market-based rates, doing so could price out low-income residents and undermine the department's role as a community asset that provides affordable recreation opportunities for all. He said the goal of this session was to take a step back and consider the department holistically and to discuss overall priorities, hear feedback, and help shape the COM's approach heading into the next budget season.

Responding to a question from Councilmember Adams, Ms. Moore confirmed that if the previously proposed program reductions had been implemented, the department's budget would have been \$55.5 million instead of \$57.8 million.

Vice Mayor Somers recommended that staff present the proposal to the Parks and Recreation Advisory Board for review and feedback.

In response to a question from Councilmember Duff, Ms. Moore confirmed that the department continues to offer scholarship programs to ensure no participant is turned away due to inability to pay. She pointed out that while these programs were previously supported by American Rescue Plan Act (ARPA) funds, those funds have ended, and the resulting revenue loss is now absorbed by the department. She added that families demonstrating financial need receive a 50% fee reduction, and staff work individually with families to establish affordable payment plans. She also reported that the department recently received a \$50,000 grant from the Gila River Indian Community to help offset these costs.

Responding to a comment from Mayor Freeman, Mr. Butler clarified that a 30% cost recovery is considered low and stated that staff will continue to evaluate budget targets annually, noting that the City has planned for 2% reductions over the next few years to allow revenue growth to align with expenses. He emphasized that these targets will be revisited each year based on economic conditions and overall fiscal performance.

Mayor Freeman thanked staff for the presentation.

2. Acknowledge receipt of minutes of various boards and committees.

2-a. Economic Development Advisory Board meeting held on September 2, 2025.

It was moved by Councilmember Duff, seconded by Vice Mayor Somers, that receipt of the above-listed minutes be acknowledged.

Upon tabulation of votes, it showed:

AYES – Freeman–Somers–Adams–Duff–Goforth–Heredia–Spilsbury

NAYS – None

ABSENT – None

Carried unanimously.

3. Current events summary including meetings and conferences attended.

Mayor Freeman and Councilmembers highlighted the events, meetings, and conferences recently attended.

4. Scheduling of meetings.

City Manager Scott Butler stated that the schedule of meetings is as follows:

Thursday, October 30, 2025, 7:30 a.m. – Study Session

5. Adjournment.

Without objection, the Study Session adjourned at 9:46 a.m.

MARK FREEMAN, MAYOR

ATTEST:

HOLLY MOSELEY, CITY CLERK

I hereby certify that the foregoing minutes are a true and correct copy of the minutes of the Study Session of the City Council of Mesa, Arizona, held on the 23rd day of October 2025. I further certify that the meeting was duly called and held and that a quorum was present.

HOLLY MOSELEY, CITY CLERK

Downtown Mesa Micromobility & Parking Plan

Jeff McVay

Manager of Urban Transformation

Jimmy Cerrachio

Urban Transformation Project Manager

Anthony Rodriguez

Urban Transformation Project Manager

The Micromobility and Parking Plan will improve transportation options and connectivity as Downtown Mesa experiences growth in residents, workers, and activity by creating a sustainable, walkable, multimodal network while optimizing current parking resources and planning for future needs.

Project Goals

Foster a welcoming, vibrant, and thriving downtown environment, without displacing residents and businesses

Integrate parking solutions that support and enhance downtown activity

Improved infrastructure to promote a multimodal downtown

Ensure safety for all road users, including pedestrians, transit riders, and bicyclists

Enhance cyclist, light rail, and bus facilities within the core study area to improve safety and comfort

Improve pedestrian and cyclist crossings and major intersections across the light rail corridor

Identify upgrades to pedestrian amenities on Main Street to improve safety and comfort

Enhance wayfinding systems throughout Downtown

Engagement

- Four stakeholder meetings
- Councilmember meetings
- Two public meetings
- Mesa Listens Project Page
- Study session

Existing Conditions

mesa•az

Existing Conditions

- Wide roadways
- Wide lanes that encourage high speeds
- Unnecessary left turn lanes
- Lack of space for bike and scooters to travel safely

WEST 1ST STREET - 3,500 DAILY VEHICLES

Existing Conditions

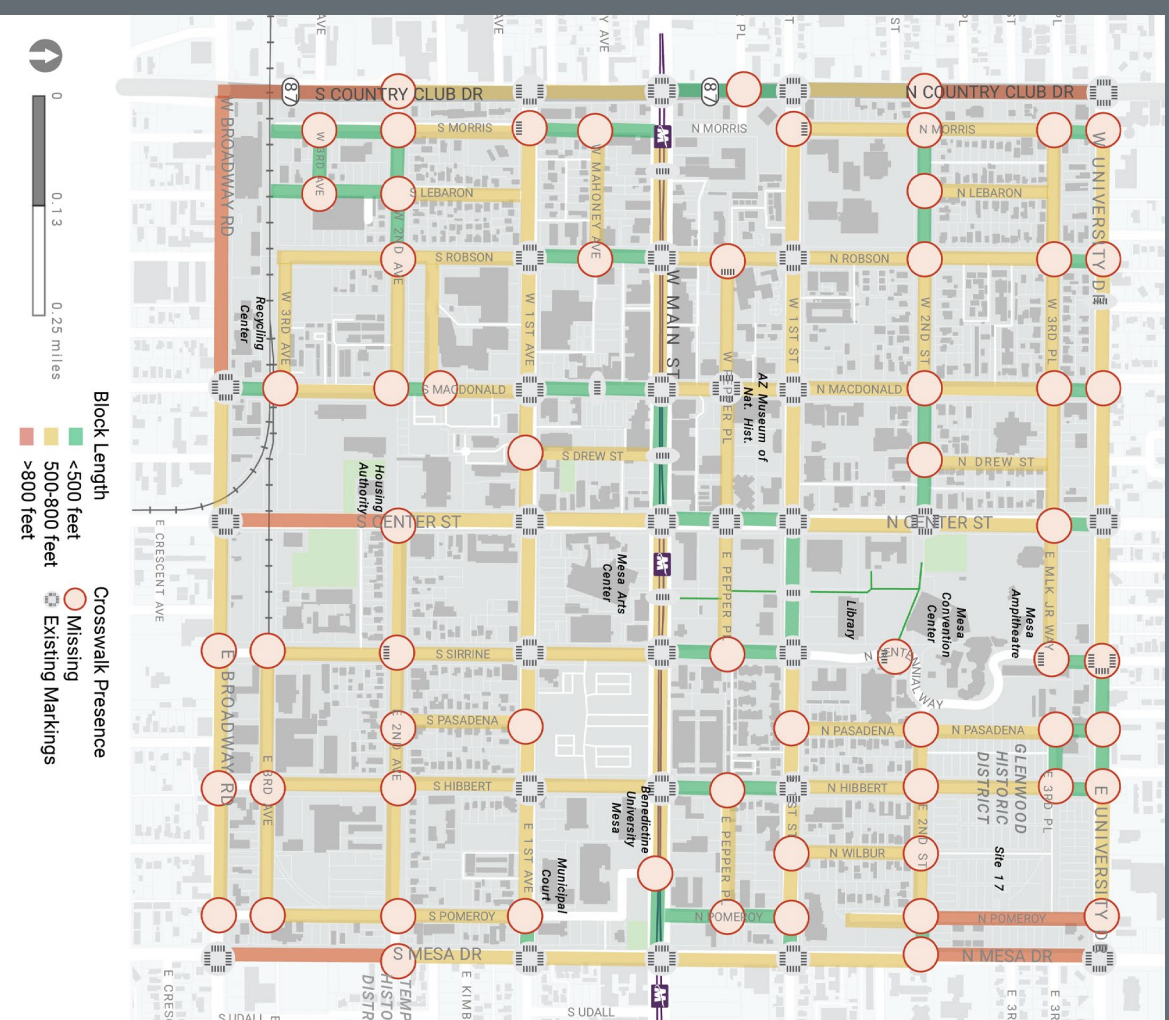

South Macdonald

South Ashland

-

mesa·az

Existing Conditions

- Perceived lack of parking
- Confusing parking regulations
- Lack of clear wayfinding
- No dedicated pick-up/drop-off areas

Recommendations

Recommendations

- Parking Reforms
 - Reframing how drivers park Downtown
 - Modifying the permit system
- Right Sizing the Road Network
 - Removal of unnecessary turn lanes
 - Adjust lane widths
 - Increase the person throughput with more micromobility options
- Improving Navigation in Downtown Mesa

mesa•az

Parking Reforms

Options for Parking for Downtown – Ideal

1 Street Parking

- Universally accessible
 - Most popular for visitors
 - Front door access for merchants
- Encourage availability for those spending money at Downtown businesses

2 Public Off-Street Parking

Manage longer-term parking for employees, residents, and long-term visitors

3 Private Off-Street Parking

- Accessible to tenants only
- Potential for shared-parking

mesa·az

Parking Reforms

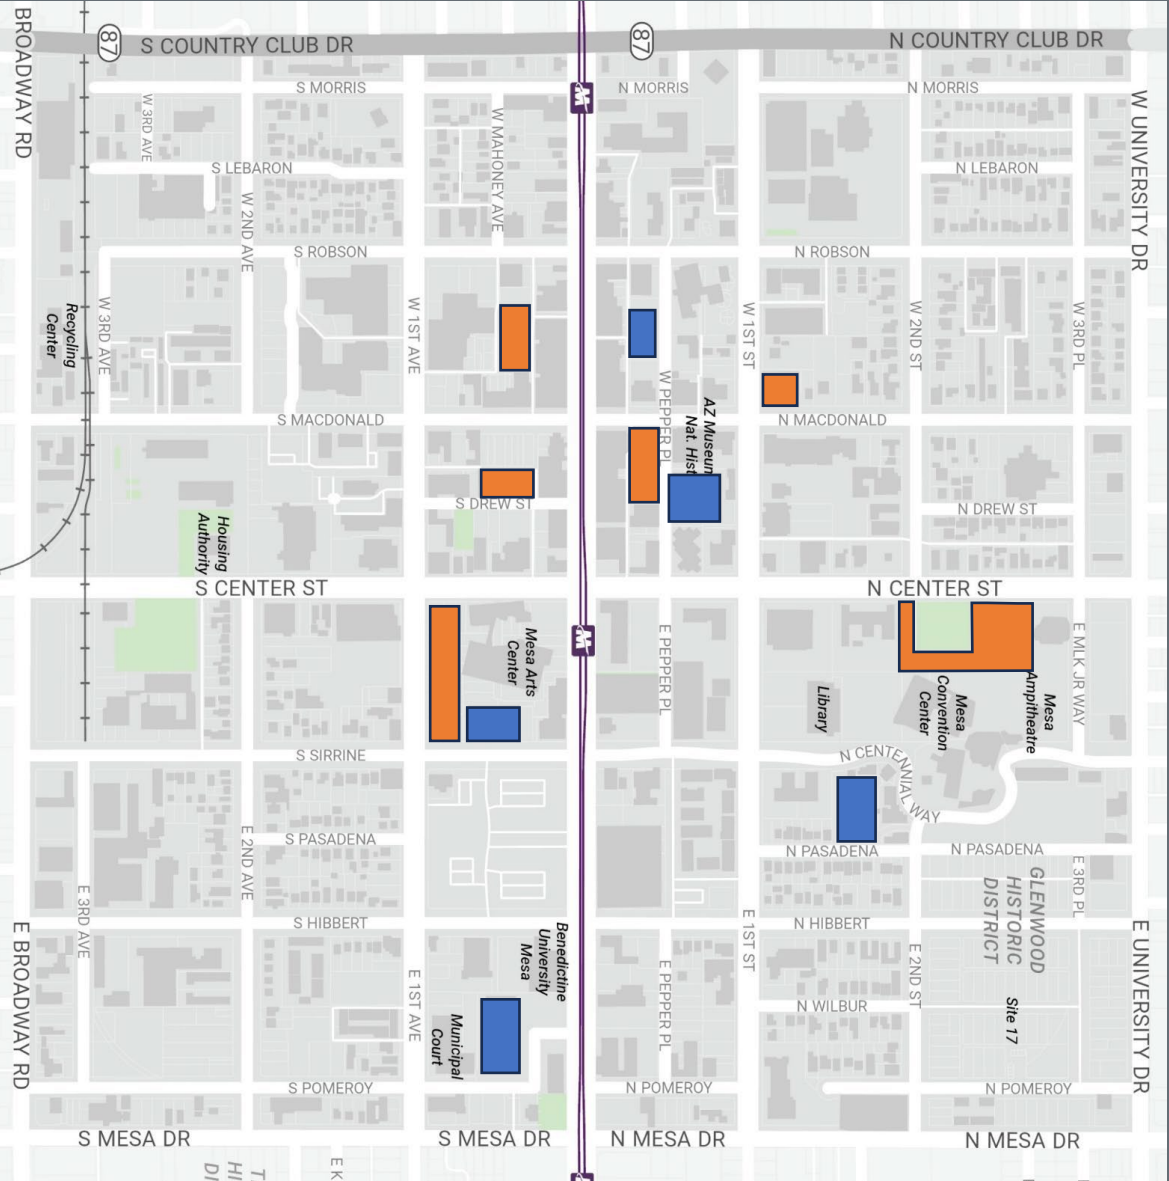

2-Hour Time Limit

- On-street public parking
- Standardize with 2- and 3-hour time limits
- Ensures parking is easier to understand and customer have parking access
- Long-term opportunity- Priced parking
 - Consider when parking demand is higher (over 85% occupancy)
 - Contribute revenue to parking benefit district

- Off-street public parking (garages and lots)
 - Intended for longer-term uses
 - 3-hour time limits and permit users
 - Expand access to purchase day passes
- Private parking
 - Explore opportunities for shared-parking agreements
 - Consider eliminating parking minimums

mesa·az

Right Size Road Network

- Eliminate left turn lanes, replace with left-turn pockets where needed
- Reduce lane widths where possible
 - 12' feet wide if adjacent to angled parking
 - 10' feet wide everywhere else

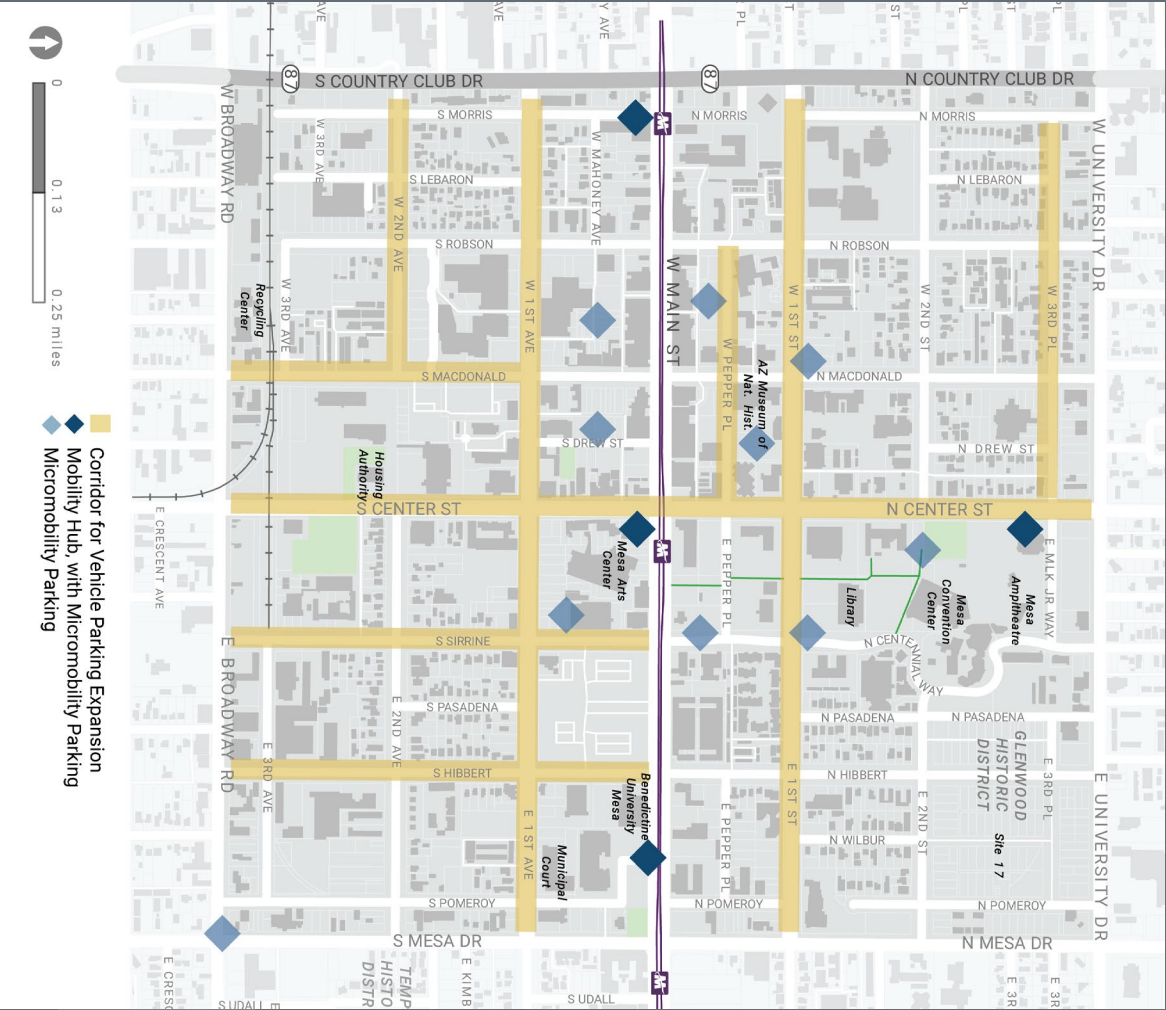

mesa•az

Right Size Road Network

- Add on-street parking where possible
- Up to 250 new parking spaces between 1st Street and 1st Avenue
- All recommendations maintain vehicular capacity with room for growth

mesa•az

Right Size Road Network

- Add micromobility lanes
- Add micromobility hubs and parking
 - Locate near transit stops and parking lots & garages
- Add dedicated pick-up/drop-off areas

West 1st Avenue

Existing

Proposed

-

Implementation

Short-term Goals	Type
Restriping plan	Improvement Projects
Establish pick-up/drop-off areas	Program
Formalize bicycle and micromobility parking locations	Improvement Projects
Adjust parking time restrictions	Improvement Projects, Program
Expand public access to quasi-private lots (shared parking agreements)	Regulatory
Daily parking pass rollout	Program

Mid-term Goals	Type
Monitor permit demand for expansion to other off-street lots and garages	Program
Reduce parking requirements for private development	Regulatory
Restriping plan	Improvement Projects
Wayfinding and navigation study	Assessment
Remove curb extensions on South Macdonald and Second Avenue to create protected micromobility lanes	Capital Improvement
Extend micromobility connections at MLK Boulevard and Second Avenue	Capital Improvement
Replace unwarranted signals with all way stop signs	Improvement Projects

Implementation

Long-term Goals	Type
Establish parking benefit district by pricing preferred parking, as demand exceeds 85% in the Main Street Core; remove all time restrictions when parking is paid	Program, Regulatory
Rebuild curb lines across Downtown to provide sidewalk level bicycle facilities and narrower pedestrian crossings, while maintain parking	Capital Improvement

- Next Steps
 - November 17th – Council Adoption
 - FY25-26 – Begin implementation of striping plan
