

City Council Report

Date: March 9, 2026
To: City Council
Through: Michael Kennington, Deputy City Manager/Chief Financial Officer
From: Edward Quedens, Business Services Director
Kristy Garcia, Procurement Administrator
Subject: Three-Year Term Contract with Two-Year Renewal Options for Traffic Signal Loop Detection Installation Services for the Transportation Department (Single Response) **(Citywide)**

Recommendation

Council is requested to approve the award as recommended.

The Transportation Department and Procurement Services recommend awarding the contract to the single, responsive, and responsible bidder, Kimbrell Electric, in an amount not to exceed \$143,750 annually, with an annual increase allowance of up to 5% or the adjusted Consumer Price Index.

Background / Discussion

This contract is for the installation of traffic signal in-pavement inductive loop detectors. Traffic signal loop detectors are used at signalized intersections to detect the presence of cars, trucks and bicycles. The contract will be used for maintenance purposes to replace existing detectors that are defective and for the installation of new detectors.

Procurement Services solicited for traffic signal loop detection installation services on December 22, 2025. Notification was sent to 160 vendors who were registered and known to provide these services. The previous solicitation that was issued in 2020 received five bid responses. Staff is unsure why vendors did not respond to the new solicitation, but 11 of 18 line items will have a lower unit price than the current contract.

Purchase Information
