

	Mtg Submitted for	Case #	Name	Address	Oppose	Support	Speak	Submit for Board Review	Comment
1	6/25/2025	Data Center Text Amendment	Satya Chandu	N/A		X		X	Data centers shouldn't be in master planned communities with no jobs creation and these facilities impact the appeal of the Neighbour hood with the noise, heat and pathetic box liked structures
2	6/25/2025	Data Center Text Amendment	Michael Nelson	N/A		X		X	I live in Eastmark, and these data centers are having a growing impact on our community. Their massive size and industrial look don't belong next to homes and are hurting the overall appearance of the neighborhood. Large trucks constantly come and go, stirring up dirt and making the area feel more industrial than residential. During shift changes, worker traffic causes major congestion on local roads. And once construction ends, they offer almost no long-term jobs. These issues are affecting our quality of life. Eastmark deserves the same protection and thoughtful planning as other communities
3	6/25/2025	Data Center Text Amendment	Christine Brewington	N/A		X		X	The residents of Mesa donot want these industrial buildings in our city. We have so much need for commercial facilities for our developing areas that need to be met. Nobody wants to live by a data center. Not to mention their significant energy and cooling requirements.
4	6/25/2025	Data Center Text Amendment	Jonathan Wells	10229 E Theorem Dr		X		X	We have lived in Eastmark for 7 years. We bought into this master plan community because of the location and the quality of the neighborhood. The last thing we were thinking about was zoning ordinances around Eastmark. Much to our chagrin, however, over the last 7 years, we have become boxed in by data centers and empty warehouses. It's not the vision we bought. This proposal for future data center design is the least the city could do to make up for the poor build up around us over the last few years. Future data centers need these enhanced guidelines. Listen to the citizens and not business
5	6/25/2025	Data Center Text Amendment	Laurie Bell	10445 E Palladium Dr		X		X	The influx of data centers has not only been an eye sore for our community they affect our quality of life. We have construction all hours of the day and night. Huge concrete walls the butt up against homes backyards, dripping out home values. Semi trucks in our narrow neighborhood streets. All these data centers utilizing our precious water supplies and providing very few jobs. Have an industrial park with few job opportunities. If I was not locked into a mortgage that I could replace Mesa would not be a place I would want to call home any more.
6	6/25/2025	Data Center Text Amendment	Jana Stults	4757 S Meteor		X		X	Data centers negatively impact our community by increasing traffic, strain our resources for power and water, reduce our home values, and are UGLY! They don't increase jobs in our community either. We want the same protections against these eyesores as other cities.
7	6/25/2025	Data Center Text Amendment	Lane Oliver	9065 Element		X		X	Data centers have already negatively impacted Eastmark. We purchased our lot specifically for the beautiful view of the mountains. We moved into our house in 2022 now all we see are cranes and monstrous ugly data centers. Get out of Eastmark!
8	6/25/2025	Data Center Text Amendment	Sam Delgadillo	9955 E Seismic Ave		X		X	Data centers offer nothing to Mesa residents and have negatively impacted residents via noise, traffic, ignoring existing "no truck/delivery" signage, they do not use our residential streets safely with children and are a nuisance to our neighborhoods. The city of Mesa cannot wonder why we don't spend our dollars here versus Gilbert and Queen creek when they offer us absolutely nothing comparable in terms of restaurants and retail yet continue to sell out for data centers. We deserve the same priority and protections of other Arizona cities against data centers.
9	6/25/2025	Data Center Text Amendment	Amy Daria	5003 S PULse Terrace		X		X	I am an 11+ year resident of Eastmark in Mesa, AZ. I have watched this area increasingly become littered with intrusive, massive concrete warehouses that have taken over literally millions of acres surrounding our master planned community. They are draining energy and water resources and there has been zero design oversight as part of their builds. We are just disgusted and frankly disappointed to see Mesa sell out to these developers at the surrounding residents expense. I strongly oppose the continuation of these developments without any oversight and resident consideration.
10	6/25/2025	Data Center Text Amendment	Rachelle Dickens	10609 E Vivid Ave		X		X	No more data centers in East Mesa! They have already negatively impacted East Mesa. Their designs are ugly, they creat noise, they create heat and are hurting our property values. We deserve the same protections that other cities have like Chandler, Phoenix and Tempe.
11	6/25/2025	Data Center Text Amendment	Kerry Marquez	554 Leisure World		X		X	No more data centers. The power grid suck and noise are enough. We have out fill. Build them in less urban areas
12	6/25/2025	Data Center Text Amendment	Susanna Rodriquez	10218 E Pantera Ave		X		X	I currently live behind a data center and i hate it. My water pressure has dropped significantly. Data centers bring constant noise, traffic, heat, and strain on our power grid—without benefiting the community. In a desert climate, their massive energy and water use is especially harmful and unsustainable. These boxy industrial buildings don't belong near neighborhoods and hurt property values. Mesa must follow other cities and put residents first. Please pass the ordinance without weakening it.
13	6/25/2025	Data Center Text Amendment	Vicki Poulson	10837 E Toluca Ave		X		X	We do not need more data centers in Mesa—especially backing up to homes!
14	6/25/2025	Data Center Text Amendment	Jorge Beltran	4841 S Pluto		X		X	<ul style="list-style-type: none"> • These facilities bring 24/7 noise, truck traffic, glare, and massive strain on the power grid — with almost no job creation or community benefit. • They're humongous industrial eyesores with cheap, boxy designs that don't belong near a master-planned neighborhood. They hurt curb appeal and risk lowering property values.
15	6/25/2025	Data Center Text Amendment	Alyssa Boyd	4835 S Meteor		X		X	I chose Eastmark for its thoughtful planning, beautiful homes, and strong community. Placing massive data centers near our neighborhoods undermines all of that. We already see the noise, heat, and traffic these facilities bring, with no real benefit in return. It's time Mesa gives Eastmark the same protections Chandler and Tempe have already implemented.
16	6/25/2025	Data Center Text Amendment	Kelly Sackley	10652 E Texas Ave		X		X	Moved to Eastmark because it was sold as a new family community in Mesa. The Data Centers and Warehouses are not part of a family community and we now have our fair share. They are an eye sore, bring no jobs but extra truck traffic. I do not understand why this is not regulated better by the City of Mesa. Please help stop this over abundance of Data centers.
17	6/25/2025	Data Center Text Amendment	Amie Chantrenne	11053 E Starkey Ave		X		X	Please no more data centers! It has already been a massive headache with the current buildings. I've been at my resident for over 10 years and have loved it but now I'm questioning about moving and so are many other neighbors I've spoken to. I never would have bought my house knowing all the industrial buildings were going to be going up.
18	6/25/2025	Data Center Text Amendment	Michelle Robertson	N/A		X		X	Our Southeast Mesa communities used to be so beautiful and now we are overrun with big, ugly, boxy gray buildings. It is awful! When we moved out to this area we were promised beautiful resorts and golf courses, and now the entire area is overrun with data centers. I cannot believe that our city is not protected from this! Our property values are already lowered, the traffic is horrible,and we've had no jobs created from these eyesores. Please protect our community!!!
19	6/25/2025	Data Center Text Amendment	Felipe Antillon	9942 E Rotation Dr		X		X	 I urge the board to reject proposals allowing data centers near residential neighborhoods. These facilities often run 24/7, bringing significant noise, light pollution, and strain on local infrastructure—all of which negatively impact quality of life for nearby residents. Additionally, their presence can reduce nearby property values and discourage long-term investment in our communities. Valuable land that could be used for much-needed housing is instead being consumed by industrial development.
20	6/25/2025	Data Center Text Amendment	Melissa Helmkamp	10211 E Catalyst Ave		X		X	I'm deeply concerned about the environmental and visual impact of new data centers in Mesa. These facilities consume excessive water and power, risk increasing noise and air pollution, and are often eyesores in our neighborhoods. I urge the city to implement stronger regulations for design standards, sustainability, noise control, and resource use. Let's ensure growth doesn't come at the cost of our health, environment, and quality of life.
21	6/25/2025	Data Center Text Amendment	Amber Masters	N/A		X		X	Good grief why are we destroying our beautiful city with these hideous data centers? There are already so many, they are huge water and other resource suckers, and make it even more hot. Please be good to your residents! This type of development is not sustainable here in the desert.
22	6/25/2025	Data Center Text Amendment	Patricia Dabrowski	9658 E Nido Ave		X		X	I have concerns related to the number of data centers being built in E. Mesa. They are taken over limited open space increasing the amount of concrete and heat index of the area. Many site are bult without leasing and sit empty. When used they use water and electricity excessively. They are not offering jobs to local residence. Instead, they bring skilled workers into an area that does not have the housing to support them. That factor requires more building, more water use, less open land, more traffic, more pollution. It's a vicious circle.

	Mtg Submitted for	Case #	Name	Address	Oppose	Support	Speak	Submit for Board Review	Comment
23	6/25/2025	Data Center Text Amendment	Janeen Hardy	10417 E Starion Ave		X		X	My neighborhood in Eastmark has been severely impacted by the data centers constructed adjacent to Eastmark. Not only are the data centers unsightly with tall buildings, sparse landscaping and industrial piping and units right next to homes and neighborhoods. There is little green buffer or otherwise between Eastmark homes and the massive data centers. Once the warehouses are occupied noise and pollution will spill into the neighborhoods of our once beautiful residential development. Our homes will depreciate in value because the city of Mesa didn't care enough to use some foresight.
24	6/25/2025	Data Center Text Amendment	Paul Young	N/A		X		X	<ul style="list-style-type: none"> Phoenix, Tempe, and Chandler have already passed tough data center regulations. Mesa hasn't — so developers are now targeting our area. These facilities bring 24/7 noise, truck traffic, glare, and massive strain on the power grid — with almost no job creation or community benefit. They're humongous industrial eyesores with cheap, boxy designs that don't belong near a master-planned neighborhood. They hurt curb appeal and risk lowering property values.
25	6/25/2025	Data Center Text Amendment	Alexandra Weathers	9762 E Resistance Ave		X		X	The data centers are ugly and the worst developments you could have built around a neighborhood. You should have sectioned an area for all of these industrial buildings. I now dislike living in Eastmark and want to move to Gilbert because it is so ugly but now our home values have dropped because of it. We will have to worry about water, electricity, etc in the future even though City Representatives so we don't. This was just a money grab for City employees who approved this so quickly. Please stop building these eyesores. Thanks
26	6/25/2025	Data Center Text Amendment	Daniel Stoecklin	10855 E Topaz Ave		X		X	<ul style="list-style-type: none"> How data centers have already negatively impacted East Mesa and How City of Mesa SOLD OUT the Eastmark Communities by letting the comercial developers surround us with these cement giants and little if any real community needs. Concerns about ugly design and high energy hogs. Why East Mesa deserves the same protections other cities now require. although more than 10 years late we still deserve better!!!
27	6/25/2025	Data Center Text Amendment	Chris Garner	4602 S Dante Cir		X		X	Enough is Enough!! If these monstrosities brought jobs with them, it would be worth it, but a data center only needs a handful of people to run them. Stop building them. Enough is enough!
28	6/25/2025	Data Center Text Amendment	Paul Landes	4161 S Apollo		X		X	Data centers have already negatively impacted Eastmark the massive buildings have destroyed the esthetic of the community. I can see the towering ugly, grey concrete buildings from my yard and can hear the cooling fans at night. The fan noise is a major concern since only a section of one building fans have started. The trucks and heavy equipment clogs streets including semis going down our narrow streets. In additional, my property value has been negatively impacted.
29	6/25/2025	Data Center Text Amendment	Ryan Rafert	10711 E Travertine Ave		X		X	I'm a resident of Eastmark and strongly oppose the growing number of data centers in our community. These facilities are noisy, unattractive, and generate heat—damaging our quality of life and lowering property values. Eastmark was built as a family-friendly, scenic neighborhood, and it deserves the same protections other cities provide. Please reconsider zoning and enforce design standards that reflect our community's character.
30	6/25/2025	Data Center Text Amendment	Brandy Wood	9812 E Red Giant Dr		X		X	The Edgecore data center was built directly behind my house. It has tanked my home value and made it nearly impossible to sell. Homes on my street have sat on the market for 6+ months. They are an eye sore. One I can see from inside my house. As a Mesa tax payer and lifelong resident I'm sick over this. These data centers cause traffic, noise, excessive power usage and bring no new jobs to community. These data centers do not belong in residential neighborhoods!
31	6/25/2025	Data Center Text Amendment	Amber Hinton	10731 E Lumiere Ave		X		X	There are too many data centers in East Mesa. They are an eye sore and don't bring in substantial employment to boost our economy. We need to conserve water here in the desert and these companies are not helping with that. We need stipulations and regulations to limit how many data centers are allowed to protect our community and home values from declining (monitarily and physically).
32	6/25/2025	Data Center Text Amendment	Marc Weiler	9358 E Strobe Ave		X		X	The data center situation is an eye sore. Nothing but massive buildings and cranes all the way down Elliott. Not to mention the appalling sight of all the warehouses on Ellsworth, Ray, and the like. Eastmark is a highly regarded community, and we pay a premium to live here. We're beyond sick and tired of this area feeling like a cold, heartless industrial complex. Stop allowing big tech to skirt regulations and continue to build. These people don't live here, and don't feel the effect of having these data centers and warehouses shoved down our throats. Do your job and serve the constituents
33	6/25/2025	Data Center Text Amendment	Trevor Robertson	11102 E Rutledge Ave		X		X	Improving regulations on locally built data centers in Mesa is a fantastic idea. Concerning the already built centers along Elliot Rd. and in towards the Eastmark neighborhood, they generate noise and visual disturbance, extra traffic among other issues. The promise of the homes in Eastmark and surrounding homes was not ugly visual design. If they need to be built, they need to add value to the area, not remove. I think adding protections against many of these issues is crucial to keep residents enjoying their homes in the future without sacrificing the high value market of data centers
34	6/25/2025	Data Center Text Amendment	Muge Acik	N/A		X		X	I live right behind Edge Core data center where they have built 3-5 story tall data centers. The planning of the buildings is very poor. Tall ones are so close to our houses that blocked our sky and mountain views. If they could have built 1story near Elliot and Eastmark Pkwy like Meta, we would not complain. The machines failed so many times, got fire with black smoke, are very noisy night times with ACs on. Their white bright LED lights on top are projected onto our houses. They look ugly with no aesthetic view. Our houses lost value for at least 10%. Who will be responsible now to pay us? ***photos provided - see end of doc***
35	6/25/2025	Data Center Text Amendment	Jill Emanuel	2902 E Dartmouth St		X		X	Our community has already seen the negative impacts of unchecked data center development. These massive data centers bring constant truck traffic, 24/7 mechanical noise, glaring lights, and excessive heat output — all without contributing meaningful jobs or neighborhood benefit. They're not just a nuisance; they undermine the livability and curb appeal of the very communities Mesa worked hard to cultivate.Please pass this ordinance without weakening it. East Mesa deserves to be protected just like other parts of the Valley already are. Let's show residents that our city leaders are listening.
36	6/25/2025	Data Center Text Amendment	Heather Farr	10554 E Simone Ave		X		X	I moved to Mesa from Chandler last July and one of the biggest contributing factors was the data center that was right next to my previous subdivision. The constant humming or buzzing sound is enough to make a person go crazy. They are ugly. They put off heat and I don't want my property value lowered because that's what they will do. They are a 24/7 operation with big trucks going in and out nonstop. It's constant noise from either the big trucks or the humming from inside the data center. We definitely don't want them here!
37	6/25/2025	Data Center Text Amendment	Megan Ramsey	10854 E Ramona Ave		X		X	We the residents of southeast Mesa do not want anymore concrete buildings! We don't want more data centers. They are ugly, they trap in heat, they block the views, too much traffic, ENOUGH
38	6/25/2025	Data Center Text Amendment	Kathleen Segar	4659 S Romano		X		X	 We moved to Bella Via in 2009 across from what is now Eastmark.The extreme numbers of warehouses has brought damage to our roadways, which were in really great shape on both Elliot and signal Butte. I am most concerned What will happen to these buildings if they aren't used . more than half have four lease signs on them.I am also greatly concerned about the amount of landscaping which requires water that they have put in around each of these buildings . MESA has a desert drought resistant policy. Why is it not being implemented with these new warehouses?
39	6/25/2025	Data Center Text Amendment	Griffin Turbow	5142 S Curie Way		X		X	I support this issue but would like the redline language removed for it to apply to all data centers including unbuilt projects.
40	6/25/2025	Data Center Text Amendment	Leija Counts	10447 E Thornton Ave		X		X	I support the ordinance but want all the redline language removed allowing unbuilt projects to avoid new protections. There should NOT be any ability for developers and these projects to bypass, avoid, or otherwise sidestep these protections now or in the future.
41	6/25/2025	Data Center Text Amendment	Mahesh Vepuri	S Ferric		X		X	Please concern people safety, not data centers
42	6/25/2025	Data Center Text Amendment	Sharris Middleton	4606 S Anitole Way		X		X	I support the ordinance, but I want the redlines removed. Unbuilt projects should be subject to the ordinance. They should not be able to bypass these requirements because they are affecting our residential community of Eastmark. Please regulate these data centers so we can live in harmony.

	Mtg Submitted for	Case #	Name	Address	Oppose	Support	Speak	Submit for Board Review	Comment
43	6/25/2025	Data Center Text Amendment	Dora Galantai	5046 S Figueroa Ln		X		X	I support the ordinance but want the redline language removed, especially the section that allows unbuilt projects to avoid new protections
44	6/25/2025	Data Center Text Amendment	Kerri C	9811 E Speed Ave		X		X	No more data centers. There are, too many. Our view of the mountains has been obstructed with cranes and tall buildings. We paid a lot of \$ for our house and should be able to enjoy the view of the natur surroundings.
45	6/25/2025	Data Center Text Amendment	Ricardo Rangel	9741 E Research Ave		X		X	I do support the ordinance but I don't want the redline language. I don't want anything added to lower the effects and oversight brought by the ordinance. I especially want for the unbuilt projects to have to abide by the new ordinance.
46	6/25/2025	Data Center Text Amendment	EB C	9811 E Speed Ave		X		X	No more data centers! The data centers are obtrusive and hurting home values.
47	6/25/2025	Data Center Text Amendment	Caitlin Greco	10712 E Sebring Ave		X		X	Data centers are devaluing property in Eastmark. It's a health concern and honestly seems like a class action lawsuit in the making. Put data centers in the middle of nowhere not in a family neighborhood. Hard working families are losing money on their homes while big tech profits.
48	6/25/2025	Data Center Text Amendment	Tyler Greco	10713 E Sebring Ave		X		X	I support the ordinance but want the redline language removed.
49	6/25/2025	Data Center Text Amendment	Shaunna Kraniger	4806 S Rhodium Ln		X		X	I support, but believe the red line language should be removed
50	6/25/2025	Data Center Text Amendment	Brandon Kraniger	4806 S Rhodium Ln		X		X	I support the ordinance but want the redline language removed - especially the section that allows unbuilt projects to avoid new protections.
51	6/25/2025	Data Center Text Amendment	Jennifer McCafferty	10461 E Wavelength		X		X	I support the ordinance but urge you to remove the redline that allows unbuilt data centers to bypass new standards. Eastmark and Mesa deserves protection from noise, heat, and poor design. Don't let outdated approvals override transparency and community safeguards. There is a perception that the city does not care about residents. Please show that you actually do care.
52	6/25/2025	Data Center Text Amendment	Erica Peitler	10461 E Wavelength		X		X	As an Eastmark resident, I support the ordinance but strongly oppose the redline that exempts unbuilt data centers. These projects still threaten our homes and quality of life. We need full protections for every site moving forward. Can't believe this was even suggested. I wish I lived in Gilbert... This city seems like it's completely for sale...
53	6/25/2025	Data Center Text Amendment	Brian Galbreath	10155 E Revolution Dr		X		X	We support the ordinance but want the redline language removed, especially the section that allows unbuilt projects to avoid new new protections.
54	6/25/2025	Data Center Text Amendment	Leslie Phipps	10019 E Tallahassee Ave		X		X	I support the ordinance but please remove the grandfathered redlines and help us make all data centers not yet built to follow the guidelines. We were sold on beautiful views of the superstitions and some of us can't even see sky because a humongous data center is right in their backyard.
55	6/25/2025	Data Center Text Amendment	Sarinah Brooks	10222 E Plata Ace		X		X	When we moved to East Mesa years ago, it was so quiet and peaceful in our evening walks. Now, there is a loud humming and other noises thru the night. Residential has taken a back seat to commercial and the noise level is continuing to increase to all hours of the night. Please consider noise ordinances and parameters around hours of day.
56	6/25/2025	Data Center Text Amendment	Jasmine Galbreath	10155 E Revolution Dr		X		X	Data centers have already negatively impacted Eastmark which was previously pleasing to the eye but now is a terrible eyesore in which I'm no longer proud to live. The designs are not appealing, the traffic's, noise and future heat from the buildings will cause the neighborhood to decline. Why is it okay for Eastmark to be flooded with data centers and warehouses yet no other cities tolerate the implementation of these monstrosities? We deserve the same protections other cities require. When I can afford to move from this place I will and so will a few of my neighbors I've spoken to. Shame.
57	6/25/2025	Data Center Text Amendment	Jordan Van Loon	4319 S Electron		X		X	I support the ordinance but want the redline language removed, especially the section that allows unbuilt but approved projects to avoid the new protections laid out in this ordinance.
58	6/25/2025	Data Center Text Amendment	Zack Weatherford	10730 E Travertine Ave		X		X	This ordinance is a necessary step forward, but the grandfather clause weakens it. Eastmark residents should not be subject to old, lower standards. Please remove the redline language and apply the new rules to all projects — built or not. Don't sell out to big business pleaseeee!
59	6/25/2025	Data Center Text Amendment	Courtney Loven	10631 E Hawk Ave		X		X	I support the ordinance, but want the redline language removed. The section that allows unbuilt projects to avoid new protections is a major concern for neighborhoods like Eastmark. This area has been filled with empty industrial style buildings and has completed ruined what Eastmark and surrounding neighborhoods should have been. There needs to be higher standards and Mesa has to do better. Thousands of people moved to this area, sold on the dream of a walkable, family friendly area with unique amenities. Now, it is surrounded by data centers and vacant concrete buildings. Please stop!
60	6/25/2025	Data Center Text Amendment	Nicole Weathorfold	10730 E Travertine Ave		X		X	Support the ordinance — but remove the loophole. Allowing unbuilt data centers to move forward under outdated rules puts Eastmark at risk. All projects should meet the same modern standards. No exemptions. No exceptions. Queen Creek and Gilbert seem to get it right don't sell out the residents for once....
61	6/25/2025	Data Center Text Amendment	Victoria Carlson	10441 E Palladium Dr		X		X	I support the ordinance but I want the redline language removed. I don't want unbuilt projects to avoid new protections. I would like our neighborhood to be growing and not have to worry about lots of noise from big working
62	6/25/2025	Data Center Text Amendment	Rachel Moreth	9957 E Strobe Ave		X		X	I support the ordinance but want the redline language removed. Especially the part that allows unbuilt projects to avoid new protections.
63	6/25/2025	Data Center Text Amendment	LaDonna Stamps	9734 E Kinetic Dr		X		X	I want the redline language removed, especially the section that allows unbuilt projects to avoid new projects.
64	6/25/2025	Data Center Text Amendment	Chad McGowan	10543 E Sheffield Dr		X		X	I support the ordinance but the redline language that allows unbuilt projects to avoid new protections needs to be removed. We need better protection for the homeowners in Eastmark.

	Mtg Submitted for	Case #	Name	Address	Oppose	Support	Speak	Submit for Board Review	Comment
65	6/25/2025	Data Center Text Amendment	Stacie Weber	4309 S Nano Dr			X		
66	6/25/2025	Data Center Text Amendment	Siobhan Jones	10559 E Relativity Ave		X		X	I support the ordinance but I want the redline language removed - especially the language that allows unbuilt projects to avoid new protections. We need strong standards that apply to every data center!
67	6/25/2025	Data Center Text Amendment	Gregory Cole	10350 E Kinetic Dr		X		X	I support the ordinance but want the redline language removed- especially the section that allows unbuilt projects to avoid new protections
68	6/25/2025	Data Center Text Amendment	Jeremy Wagner	9816 E Speed Ave		X		X	I support the ordinance but want the redline language removed—especially the section that allows unbuilt projects to avoid new protections.
69	6/25/2025	Data Center Text Amendment	Mikayla Adel	9356 E Supernova Dr		X		X	I support the ordinance but want the redline language removed - specifically the section that allows unbuilt projects to avoid new protections. We need strong standards - and we need them to apply to every data center, not just the next one.
70	6/25/2025	Data Center Text Amendment	Lisa Vanecko	10437 E Sebring Ave		X		X	I support the ordinance but want the redline language REMOVED with respects to unbuilt projects
71	6/25/2025	Data Center Text Amendment	Terry Pratt	10632 E Sheffield Dr		X		X	I support the ordinance but want the redline language removed — especially the section that allows unbuilt projects to avoid new protections.
72	6/25/2025	Data Center Text Amendment	Meg Greway	4509 S Mole		X		X	I support the ordinance but want the redline language removed especially the parts that allows the unbuilt projects to avoid the new protections.
73	6/25/2025	Data Center Text Amendment	Deborah Blaker	10021 E Strobe Ave		X		X	I support the project as it was written. I do not agree with the red line language and want it removed especially the part that allows unbuilt projects to avoid new protections.
74	6/25/2025	Data Center Text Amendment	Peter Kuhnen	4449 S Matter		X		X	I support the ordinance but want the redline language removed — especially the section that allows unbuilt projects to avoid new protections
75	6/25/2025	Data Center Text Amendment	Samantha Cluff	11059 E Tumbleweed Ave		X		X	We built in 2017 with the understanding that the Eastmark master plan included shops and green spaces and restaurants, and more than half of the preplanned areas we saw were ‘rezoned’ for industrial areas, like the tech corridor and many others. No only are they eyesores, those concrete buildings are increasing the heat retention and reducing native plants that help ground cover and control heat. I didn’t build to be surrounded by concrete and pollution from big delivery semi trucks, please pass this regulation to stop Mesa from becoming overwhelmed with even more concrete buildings and heat.
76	6/25/2025	Data Center Text Amendment	Anthony Duddleston	4842 S Covalent Ln		X		X	I support but want redline language removed. Particularly the part that allows unbuilt data centers to avoid protection. If they haven’t started building, they shouldn’t be exempt from adhering to current regulations.
77	6/25/2025	Data Center Text Amendment	Janet Tipton	9836 E Theia Dr		X		X	Support ordinance but want redline language removed.
78	6/25/2025	Data Center Text Amendment	Linda Ostrand	4813 S Carver		X		X	As property owners and residents of Eastmark, my family and I oppose placing data centers near residential communities. They should be set back from these areas with able landscaping between them and the homes. There is a better way to do data centers than Meta and Edge core. Thank you.
79	6/25/2025	Data Center Text Amendment	Michael Brady	N/A	X			X	I for one oppose anything that adds further restrictions to data centers in our community. I work as a software engineer in the tech industry and a common pattern is data centers appear and tech jobs follow. Look to Chandler where I currently work. Clustered around thoe data centers off of Price road are numerous tech related jobs, including the company I work for. I'd much rather work close to home in Mesa and these data centers make that more of a possibility. Besides, the alternative seems to be tilt up warehouses and it's not like those are winning any beauty contests.
80	6/25/2025	Data Center Text Amendment	Becky Dunning	9749 E Spiral Ave	X			X	I oppose this in its current form. Section 14 needs to be removed that explicitly singles out the Eastmark (Mesa Proving Grounds) neighborhood. The city has disregarded this neighborhood to line it and developer pockets. The city should not be able to pick and chose which areas receive a different set of rules. These rules should be in place for the ENTIRE city of mesa and not just some parts.
81	6/25/2025	Data Center Text Amendment	Linda Mohr-Strecker	11241 E Peterson Ave	X			X	I have lived in the Southeast Mesa area since 2002. I'm very concerned about the massive influx of data centers in the region. Our family is being greatly impacted by noise pollution and we are also very concerned about the air pollution emitted from these data centers which we believe requires an immediate study! Since the development of several data centers in the area I have recently developed adult onset asthma and respiratory issues after never having any of this during my lifetime. We definitely feel that Mesa is letting us down and is not been concerned about public health!!
