Justification & Compatibility Statement

To better understand the reasoning for the Variance requested we will need to go back a few years to understand the hardship our family has been going through.

- Dorcas' health concerns (physical) in 2018 as she was diagnosed with Cervical Cancer and with much treatment, and surgery she could have the cancerous cells removed from her body. With this surgery, she was out of work for six months. The extensive treatment made Dorcas very weak and unable to contribute to the household financially.
- Divorce across the country (emotional trauma). I was with my husband of 22 years and once my children and I moved to Arizona, we decided to separate but still stay married for the children's wellbeing. The time passed and together we decided it was best to Divorce, because we weren't living together in the same state, therefore, putting a strain on our relationship. We both have a healthy relationship and are on speaking terms when it comes to any activities for the children.
- We are dealing with children after our divorce, they were upset and having a hard time understanding all the things that were going on with their parents. They were trying to understand all the things that happened and how that was going to change the future.
- With all these factors, it has been impossible to have a peaceful and efficient household and building this addition will help alleviate a bit of the financial strain these last few years have placed on our family.
