Thanks, Stephen.

Yes, we would appreciate one or two of these units, connecting to a 120-volt constant feed (not batteries, which burn out in four weeks) at the exterior area.

I look forward to continued discussion.

***Thanks,***

**Subject:** Working With The Neighborhood

Hi Jennifer,

My staff and I have continued the dialog with the neighbors near the Mesa Shores shopping center.

Mesa Dogs 24/7 has agreed to install the dog silencer device, as per suggested by David Brown, in our outside area as a provision for permitting.

Our discussions have been productive and fair for all parties. We continue our commitment to being a good neighbor.

Regards,
