Job Order Master Contracts (JOC) - Fire Safety Construction Services (Citywide)

The selection of three contractors is needed for the Master JOC for fire safety construction services. These services will include new construction, renovations and repairs, additions, and facility upgrades for City buildings and facilities related to fire safety improvements. Contracts are for three full years, with two optional one-year extensions of the contracts based on successful contractor performance and City concurrence.

Staff recommend awarding AP Fire Protection, CertiPro Fire and Life Safety, Inc. and Metro Fire Equipment, Inc. for Job Order Master Contracts. Individual job orders will have a limit of \$4,000,000 per job order, or as otherwise approved by council.
