One-Year Renewal Contract for Advanced Traffic Controllers and Software for the Transportation Department **(Citywide)**

This contract provides Linux-based Advanced Traffic Controllers and controller firmware that runs on the controllers. This equipment has advanced light rail transit features absent in other software options and has been deployed at signalized-intersections in the light rail corridor and will likely expand to other signalized locations throughout the City.

The Transportation Department and Purchasing recommend authorizing the renewal with Clark Electric Sales, Inc., dba Clark Transportation Solutions; and Advanced Traffic Solutions, LLC, dba Fourth Dimension Traffic; cumulatively not to exceed \$120,000, based on estimated requirements.
