Three-Year Term Contract for Major Repair Services for Caterpillar Generators for the Water Resources Department (**Citywide**)

A significant number of generators in water and wastewater facilities to provide standby power and/or peak shaving are Caterpillar generators. This contract will provide a source for major repairs that fall outside the scope of the City's contract for routine maintenance and minor repairs.

Water Resources and Purchasing recommend awarding the contract using the City of Tucson National IPA cooperative contract with Empire Southwest LLC, dba Empire Power Solutions (a Mesa business), at \$200,000 annually, based on estimated requirements.
