File #: 18-0673, **Version:** 1

Purchase of One Medium-Duty Aerial Bucket Truck and Service Body (Addition) for the Parks, Recreation and Community Facilities (PRCF) Department (**Citywide**)

This aerial bucket truck with a utility body and dual rear wheels will be used daily in the Park Maintenance Division for light pole, tall play structure, and water feature maintenance at heights that exceed current equipment reach and/or locations inaccessible by a trailer lift unit. PRCF has been renting a unit but the daily use supports acquiring a vehicle for full-time use.

The Fleet Services, and Parks, Recreation and Community Facilities Departments, and Purchasing recommend authorizing the purchase from the existing contract with Altec Industries, Inc., at \$127,131.63. This purchase is funded by the Capital General Fund.
