File #: 22-1375, **Version:** 1

Purchase for One Airless Paint Line Striping Machine (Addition) for Falcon Field Airport (Single Response) **(Citywide)**

This purchase will provide an airless paint line striping system plus self-propel system. Falcon Field Airport has determined it is more cost effective and timely to have their own line striping equipment and perform the important function of line striping in-house. The Airport is required to comply with visibility requirements as stipulated by federal and state agencies for airfield striping and marking, and requires high visibility painted lines for required demarcation on airfield paved surfaces.

Falcon Field Airport and Purchasing recommend awarding the contract to the single, responsive, and responsible bidder, Roadsafes Traffic Systems, Inc. for \$36,500. This purchase is funded by the Falcon Field Fund.
